Peperomia glabella

PEPEROMIA KOKEDAMA

CYPRUS PEPEROMIA, WAX PRIVET PEPEROMIA

PEPEROMIA KOKEDAMA

Native to the West Indies and South America, this is a hardy trailing plant that grows in warm conditions and enjoys ample water. Wild in nature it grows as an epiphyte on trees and ground cover on the forest floor.

TEMPERAMENT: Grows well in 65°F - 75°F temperatures.

LIGHT: Prefers medium-to-low direct sunlight.

WATER: Weekly. Submerge $\frac{3}{4}$ of the kokedama in water in a glass or metal bowl for 10 -15 minutes or whenever the ball feels light and dry. Gently squeeze out excess water and place back in the saucer.

PET FRIENDLY: Yes.

AIR CLEANING: Peperomias are particularly good at getting rid of formaldehyde.

SIGNS OF DISTRESS:

Droopy leaves, mushy stems, and moldy soil

The plant is over watered.

Remove the damaged bits and dry out the soil.
