Monstera deliciosa

SPLIT LEAF MONSTERA KOKEDAMA

SPLIT-LEAF PHILODENDRON

SPLIT LEAF MONSTERA KOKEDAMA

This lush, tropical kokedama is prized for its unique split leaf foliage and easygoing nature. It loves bright light but is also more than happy in partially shaded areas.

TEMPERAMENT: Easy-to-grow.

LIGHT: Bright indirect sunlight or partial shade.

WATER: Submerge $\frac{3}{4}$ of the kokedama in water in a glass or metal bowl for 10-15 minutes or when the ball feels light and dry. Gently squeeze out excess water and place back in the saucer.

PET FRIENDLY: No, toxic to both cats and dogs.

AIR CLEANING: One of the most effective plants for reducing pollution.

SIGNS OF DISTRESS:

Yellow leaves, droopy leaves, white spots, no new growth, and a wilting plant

Ensure that the plant is not in direct sunlight or being overwatered.
