Portulacaria afra variegata

VARIEGATED ELEPHANT BUSH KOKEDAMA

VARIEGATED ELEPHANT JADE, SMALL LEAF JADE, RAINBOW BUSH

VARIEGATED ELEPHANT BUSH KOKEDAMA

A member of the cactus/succulent family, this variegated kokedama features beautiful deep purple stems and contrasting greyish-grey leaves. Because it's a succulent it doesn't require much water.

TEMPERAMENT: Easy-to-grow.

LIGHT: Likes full sun to partial shade.

WATER: When the ball feels light and dry, submerge $\frac{3}{4}$ of the kokedama in water in a glass or metal bowl for 10-15 minutes. Gently squeeze out excess water and place back in the saucer. Allow soil to dry out completely between watering.

PET FRIENDLY: Generally non-toxic for pets and humans.

AIR CLEANING: *Portulacaria afra* works as an incredible carbon sponge, absorbing high levels of carbon from the air.

SIGNS OF DISTRESS:
Leaves fading or turning yellow.
Check the plant isn't in a cold place or being overwatered.
