

FLEXIBLE ACROSS BOATING & FISHING

Sharks have short-range electrical receptors in their snouts, used for finding food. Ocean Guardian's patented technology creates a powerful three-dimensional electrical field which causes spasms in these sensitive receptors turning sharks away, including Great Whites.

Easy to deploy off the back of any vessel, the new FISH01 is based on the proven design of the Ocean Guardian FREEDOM7 dive product and provides a large and powerful protective area to keep your catch safe from sharks.

Nothing is more effective.™

PROTECT YOUR CATCH!

THE WORLD'S
ONLY PROVEN
SHARK DETERRENTS

Nothing is more effective.™

SAY NO TO SHARK TAX WITH THE FISH01!

The Ocean Guardian FISH01 is the world's first innovative long-range shark deterrent system, powered by Shark Shield Technology and designed specifically for fishing. Fish off the back of your boat worry-free, knowing that your catch is protected from the dreaded shark tax. Sharks are opportunistic by nature, naturally singling out any food source that appears easy to exploit. No-where is a shark's opportunistic behaviour more apparent than when fishing... and a struggling fish is irresistible to sharks.

The Ocean Guardian FISH01 has been developed specifically for fishing and improving your catch rate, with research showing the use of Shark Shield Technology in fishing resulted in:

- Preventing the majority of shark's species from attacking hooked fish
- A significant reduction in the number of incidents of predation
- Improvements in the efficiency of operation resulting in less time spent at sea.

Powered by **Shark Shield® Technology**

SPECIFICALLY DESIGNED FOR FISHING

1. SUBSEA GRADE CONNECTORS
2. ON / OFF SWITCH & LED
3. LARGE 3MM O-RING SEAL
4. STRONG NYLON CAGE
5. PCB & LITHIUM BATTERIES
6. CASING TESTED TO 200 METRES

ANTENNA CREATES A POWERFUL ELECTRICAL FIELD

- 6.8 metre antenna has three electrodes, with the outer electrodes toggling between the centre one
- Powerful electrical field created up to 15 metres (49') deep and 6 metres (19') wide
- Protect your catch at depths up to 200 metres (656')
- Antenna is end-user installable with no tools required.

PROTECTIVE NYLON BRAID

MARINE 316 STAINLESS STEEL MESH ELECTRODE

ELECTRICAL INSULATION

ELECTRODE POWER

WILL THE FISH01 SCARE AWAY THE FISH I'M TRYING TO CATCH?

The FISH01 has no effect on your target fish species. Shark Shield Technology has been developed to specifically take advantage of the highly sensitive electrical receptors called the "Ampullae of Lorenzini" present in a Sharks snout. As fish are without these receptors, our Shark Shield Technology has negligible effect on them.

Simply drop the FISH01 power module with the antenna installed off the back of your boat to freely drift around with your line in the current or attach it to the drop-line so that it is positioned vertically in the water.

HOW IT WORKS

Shark Shield Technology consists of two electrodes which, when both are submerged, emit a three-dimensional electrical field that surrounds the user or area. Shark Shield Technology is the world's only scientifically proven and independently tested electrical shark deterrent. Nothing is more effective.

- When a shark comes within a few metres, the strong electrical field emitted by the device causes the shark to experience muscle spasms
- This does NOT harm the shark in any way, merely causing it to experience a high level of discomfort
- Industrial strength designed power module
- All day use with a powerful 10-12 hour rechargeable lithium battery, or power from your vessels 12V/24V
- Easy to see LED operational status including battery life indicator
- Power module depth rated up to 200 metres (656 feet) for fishing.
