

#D-122 Instruction Manual

➤ Dear valued customer:

Thank you for choosing our products! You have taken an important step in organizing and protecting your most valued possessions. Every series of our safes is professionally made and designed to provide safety. Please take time to read and familiarize yourself with the proper operating procedures of your new safe presented on the following pages.

➤ Initial Use

- ① Anti-clockwise turn the housing of the keypad to get the panel off
- ② Insert the 9V battery
- ③ Input the code (user code, master code, emergency code) to unlock the door

➤ Insert the batteries

- ① Take the keypad housing off and insert a new 9V battery
- ② The red light flashes means you should replace a new battery

➤ Open the door

- i. Use user code or master code
 - ① Input your user code or master code (both are 1 to 8 digits) and then press “#” button
 - ② Green light flashes once means the code is right, you can clockwise turn the handle to open the door
 - ③ If the code is wrong, the panel will alarm
- ii. Use emergency code
 - ① Press ‘#’ twice, the yellow light on
 - ② Input emergency code and press ‘#’ to confirm
 - ③ Green light flashes once means the code is right, you can clockwise turn the handle to open the door

CAUTION: The preset user code is ‘12345678’, the preset master code is ‘1234’, the preset emergency code is ‘12345678’

➤ Close the door

Turn the handle anticlockwise to close the door.

➤ Automatically locked

- ① After four continuously wrong input, the panel will lock automatically for 1 minute
- ② Another continuously wrong input will lock the panel for another 5 minutes
- ③ The panel will return to normal status until you input the right code

CAUTION:The keypad is invalid during the lock status.
