INSTALLATION NOTE: Double-door models are available with four different center-to-center dimensions between latchbolt keepers. Keepers are wide enough to compensate for vertical rod exit bolts, which may be as much as 3/8" (10 mm) off center-to-center dimension, either way. When using an electric strike in conjunction with a vertical rod exit device, it is necessary that:

1. The bottom rod of the exit device be removed or made inoperative
2. The latchbolt of the exit device be the "Pullman" or beveled type
3. The latchbolt be free-latching and remain projected while the door is open. Mechanisms that hold the latchbolt retracted while the door is open, and automatically release it when the door is closed, must be removed or made inoperative.

Keepers are wide enough to compensate for vertical rod exit bolts, which may be as much as 3/8" (10 mm) off center-to-center dimension, either way. When using an electric strike in conjunction with a vertical rod exit device, it is necessary that:

1. The bottom rod of the exit device be removed or made inoperative
2. The latchbolt of the exit device be the "Pullman" or beveled type
3. The latchbolt be free-latching and remain projected while the door is open. Mechanisms that hold the latchbolt retracted while the door is open, and automatically release it when the door is closed, must be removed or made inoperative.

700 & 742 Series | LBMLCM: When using LBMLCM with a SARGENT 78/8200 Series or BEST 40 Series Mortise Lock, a 1/2" or 5/8" keeper latchbolt detection will be dependent on the door gap in order to ensure functionality. Consult customer support regarding use with other manufacturers.

712-75, 732-75 and 742-75: The LBMLCM option is compatible with SARGENT 78/8200 Series or BEST 40 Series 3/4" throw mortise lock latchbolts in hollow metal and wood frame applications. Monitoring capabilities are dependent on a maximum 1/8" door gap in order to ensure functionality. Consult customer support regarding use with other manufacturers.
