

KL20

Introducing the KitLock KL20. Designed with simplicity in mind, the KL20 offers mechanical keyless access suitable for a variety of lockers, cabinets and cupboards.

A simple robust mechanical lock. Tough alloy front and handle. Flush mounted ideal for personal storage in offices, schools and colleges. The user selects their own 4 digit code and this remains unchanged until they wish to alter it. The user can change their code at anytime and the KL20 has the added security and convenience of auto scramble. The dials automatically scramble to 0-0-0-0 when the lock is used, thus hiding the user code from others.

BENEFITS

FUNCTIONS

The KL20 is only suitable for Private function ideal for personal storage lockers. The users can set their own 4 digit code and change this as often as they wish. With the addition of the override key, management can gain access and locate the user code.

AUTO ZERO / AUTO SCRAMBLE

When you lock or unlock the KL20 the dials automatically rest to 0-0-0-0 so the user code is hidden and cannot be inadvertently viewed.

FIXINGS

The KL20 is provided with a straight cam, back plate(s) and fixing screws as standard. An additional backplate and cranked cam are available to purchase separately.

CODE RETRIEVAL

Use the Master Override Key to open the lock, then hold down the code retrieval lever and rotate the dials until they stop. This is your code.
