LOCKLY PRO™
TOTAL ACCESS SOLUTION

LOCKLY GUARD™
FOB KEY 803P

Overview

Lockly Guard Fob Key is a small and portable contactless access tool that provides triple authentication and data transfer (ISO/IEC DIS9798-2). With its high-speed data transmission and signal processing, users can complete authentication within 100ms, reducing the time you spend RFID/fob key reader. It can operate multiple cards within the read-write range at the same time, without causing data conflict with other cards.

By using an unchangeable unique serial number, the RF data channel uses a mutual random number response authentication, data encryption and message authentication checks that prevents various cracking, tampering and duplication.

Specifications

Product Dimensions	1.58" x 1.26" x 0.17" (40.21 x 32 x 4.35 mm)
Color	Black
Credential Technology	MIFARE® S50 , 13.56 MHz
Standards	ISO14443A
Data Transfer Rate	106 kbit/s
Memory Storage	1K byte EEPROM storage space
Storage Life	Data can be stored up to 10 years
Re-write Life	100,000 times
Maximum Read Range	0.59"- 0.79" (15-20mm)
Material	PVC
Compliance	RoHS
Quantity per pack	10pcs
Include Accessory	Metal key ring holder
