ENFORCER® Bluetooth® Access Controllers Quick Installation/Setup Guide

Getting Started:

Get the complete Installation Manual, SL Access App User Manual, and more at SECO-LARM's website.

Download the SL Access[™] app from the corresponding store for your phone (iOS 11.0 and above, Android 5.0 and above).

NOTES:

- a. Be sure to set your smartphone to automatically download app updates so that you always have the latest version of the app.
- b. The app will appear in your device's default language if available. If the app does not support your device language, it will default to English.

Quick Installation:

This manual is for installers looking to do a basic installation and setup of the ENFORCER *Bluetooth*[®] keypad/reader (SK-B141-PQ shown, others similar).

Mounting and Installation

See the *Additional Information* sheet included in your product for basic mounting and installation instructions. For more in-depth installation and advanced programming instructions, see the corresponding product page at <u>www.seco-larm.com</u> and download the *Installation Manual and Administrator Guide*.

Basic Wiring Diagram

AC-Powered Lock Wiring

AC powered locks should be wired as follows. Their peripherals are wired the same as above.

IMPORTANT NOTES:

- *To protect the relay, you must install the enclosed diode—with the cathode (striped end ———) toward the positive side—for DC powered locks and install the varistor (MOV, ——) for AC powered locks and for electromagnetic locks *unless* your lock has a diode/MOV built in. Failure to use these as directed will void the warranty.
- [†]Use the blue wire for fail-secure applications and the yellow wire for fail-safe applications. Use electrical tape to insulate the end of any unused wire.

See Installation Manual and Administrator Guide online for details.

SL Access Quick Setup:

Understanding the SL Access Home Screen

Log In to the Device

- From a position near the device, click "Login" at the top left of the home screen.
- Type "ADMIN" (case sensitive) in the ID section.
- Type the factory default ADMIN passcode "12345" as the passcode and click "Confirm."

NOTES:

- a. The administrator's ID is ADMIN and cannot be changed.
- b. The factory default passcode should be changed from the "Settings" page immediately for better security (see pg. 4)
- c. Users will use the same app, and will log in in the same manner The home and login screens will look the same, however their functionality will be limited to unlocking the door, choosing "Auto," and adjusting their "Auto Proximity Range" for the app's "Auto" unlock feature.

| Door Sensor | () D | Legal Notices and P | rivacy Policy |
| Output Mode (Global) | Timed Relock | About | |
| Output Time (Seconds) | 5 | Firmware Version: V2.2 | 2 |

Four function buttons allow you to:

- Open the user page to add or manage users
- View and download the audit trail
- Back up and restore device settings (also convenient for replicating to another device).

Below the function buttons are device settings:

- Device name give a descriptive name
- ADMIN passcode change immediately
- ADMIN proximity card (except SK-B141-DQ)
- Door sensor required for the door-proppedopen / door-forced-open alarm)
- Output mode (global) timed relock, remain unlocked, remain locked, or toggle
- Timed relock output time 1~1,800 sec
- Number of wrong codes Number that will trigger a temporary device lockout
- Wrong code lockout time how long the device will remain locked out
- Tamper alarm Vibration sensor
- Tamper vibration sensitivity 3 levels
- Tamper alarm duration 1~255 min
- Auto proximity range for ADMIN app "Auto"
- Device time automatically syncs with ADMIN phone date and time
- Key tone keypad sounds can be disabled
