ECU Cable FLX2.59

FLX2.59 P1 connector to TRW_EMS2.x Cable in BENCH MODE CONNECTION

SKU Code: FLX2.59

This Cable allows to interface some types of ECU with FlexBox. As shown in the technical design section (Fig.1), it is necessary to connect to the FlexBox ports A and B. The goal of the FLX2.59 Cable is to obtain:

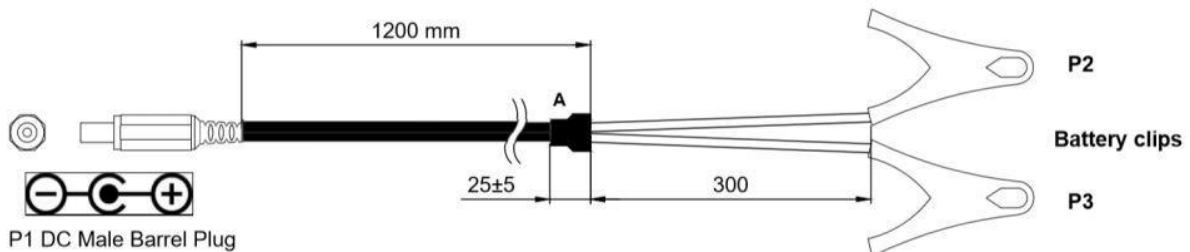

- A secure connection mode
- A faster communication speed between ECU and FLEX
- A faster connection between ECU and FlexBox
- A minimal error risk during connection

Compatibility ECU's:

TRW_EMS2.x

Additional Accessories;

FLX2.45

Correct disposal:

Waste electrical and electronic equipment is waste of a particular type consisting of many electrical or electronic equipment that the owner intends to discard as it is defective, unused or obsolete and therefore destined to be abandoned.
