

DPA: The Super Omega-3

natural force®

Better Absorption

DPA absorbs 22% better than EPA and DHA, which means you get even more anti-inflammatory, anti-aging, and heart health-boosting benefits!

Sustainable Sourcing

DPA fish oil is commonly sourced from menhaden fish, a small, highly-sustainable species found in the Atlantic Ocean.

Toxin-free

Because menhaden fish are so low on the food chain, their oil is free of harmful toxins like mercury, dioxins, and PCBs.
