

ACMOS® 103 - 30

release agents for glued wood construction

BASIS:

No substances regarded as toxic or carcinogenic according to the Regulations concerning Dangerous Substances are used in the production of **ACMOS 103-30**.

PROPERTIES:

ACMOS 103-30 (pasty) is a silicon-free release agent in particular for glued wood construction. Acts against resorcin resin glues, urea resin glues, etc.

APPLICATION:

ACMOS 103-30 thinly with a brush or cloth on the clean surfaces to be protected. Glue residues can subsequently easily be scraped off with a wooden spatula. Then apply release agent again.

Ask for **ACMOS 100-2450** release spray for smaller fields of application.

SUPPLY FORM:

Non-returnable drums with a net capacity of 5 kg, 20 kg and 170 kg.
Storage time 18 months.

Additional information can be found in the EU safety data sheet.

Our technical service department will gladly advise you on all questions concerning the application of our products. Free samples can be made available to you on request.
