

1

At first use, remove the tank from back, rinse and then fill with water. Replace the tank ensuring it is locked into place and place the lid on top.

2

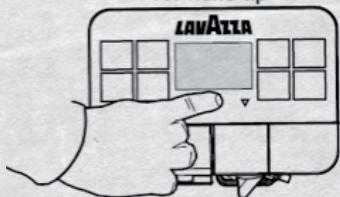

Plug the machine into the proper outlet and switch the power to "I" for ON.

3

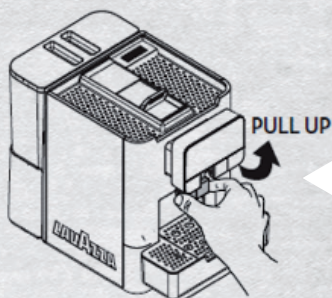

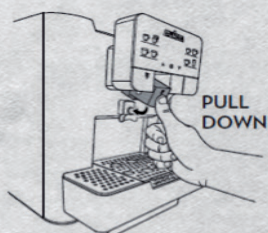

Upon powering on the machine, the screen should read SYSTEM BOOT. Let the machine start up and then when finished, press any button to wake-up the machine, machine should read HEATING UP.

Press a button for wake-up

4a

For Espresso only, please lower spout.

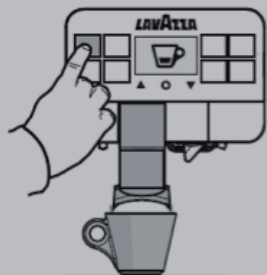

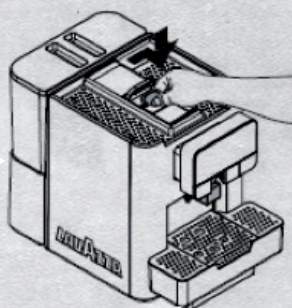

PULL UP

For Milk based beverages, ensure spout is raised.

4b

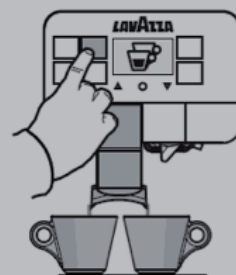

5
