

## TORRENT VICHY SHOWER SYSTEM

The WATER WERKS Torrent Vichy Shower System is designed for the ultimate combination of rain shower and high pressure massage. The Vichy rain bar provides seven individually adjustable shower heads that allow spa clients to receive a relaxing and therapeutic water treatment. The attached high pressure Scots Hose allows you to give an invigorating tissue massage with adjustments in intensity.

A variety of treatments are possible with the Torrent system including hydrotherapy, body polishing, body wraps, circulation massage, pressure point massage and skin toning. The Torrent is the only shower of its kind that allows the massage therapist to walk all the way around the table. Our system offers the most accurate temperature control, seven adjustable shower heads and the most simple operation.

Plan Detail of Mixing Valve Pipe Rough-In

Typical Torrent Vichy Shower Room Plan

Mixing Valve Cabinet Rough-In Elevation

Typical Cross Section of Shower System

1. Method of attaching shower bar and shroud to ceiling is customer's responsibility, since ceiling assemblies vary. No fasteners are included by WATER WERKS.
2. Mixing valve cabinet is designed to receive water supply from bottom; if supply is from above, piping must be looped around to bottom of mixing valve cabinet.
3. Vent all plumbing as required by local code.
4. 18" Long chrome threaded pipes are provided standard for 8'-0" ceiling height. Customer must inform WATER WERKS if finished ceiling height will not be 8'-0"±.
5. Hand held shower and grab bars are available from WATER WERKS.
6. For easiest installation, reserve rough-in plumbing until cabinet assembly is on site.
7. Wall tiling is best done after installation of mixing valve cabinet.
8. Manufacturer reserves the right to alter details and/or dimensions without notice. Contact manufacturer for most recent version of drawings.
