

TIMBER FOR MANUEL AIRES MATEUS PRODUCTS

European Douglas Fir timber is available exclusively for products designed by Manuel Aires Mateus.

The timber we use is from sustainable farms. The trees on the farms are pruned regularly to allow for consistent grain patterns and fewer knots, ensuring exceptionally strong planks of the highest quality.

Douglas fir trees can grow to very large sizes which, when regularly pruned, results in impressively wide and long planks of timber with consistent grain patterns.

Our white oil finish provides a renewable surface for enduring beauty.
