## **HALLINGDAL 65**

NANNA DITZEL

Kvadrat's first textile Hallingdal has become the archetype of woollen textiles. The very durable upholstery fabric was originally designed in 1965 by Nanna Ditzel who is known as one of Denmark's great designers. Hallingdal 65 is made of wool and viscose: the wool provides excellent durability and flexibility, whilst the viscose adds brilliance and depth to the colour. Both materials are dyed before they are spun, which highlights the rich texture of the fabric. The versatile palette includes neutral and strong, primary colours. Some colourways are unicoloured, others are constructed from 2 different unicoloured yarns, and the rest are created using unicoloured yarns in combination with melange yarns. Hallingdalhas been continually produced by Kvadrat since the company was established and it remains one of the best selling textiles of the Kvadrat collection.
