Leather Premium F

vitra.

Home/Office, L50

The properties of Leather Premium F are equivalent to those of Leather Premium. However, Leather Premium F is processed with a tanning agent extracted from olive tree leaves (a waste product of the olive harvest), and the entire production process is carried out with the least hazardous chemicals in the smallest possible amounts.

This sustainably produced semi-aniline leather is available in a selection of 6 colours.

Material

Semi-aniline nappa leather with a very soft and supple feel, vegetable tanned

Fastness to light

Type 5

Thickness

1.1-1.3 mm
