

How to Determine your Finger Size

Option A

1. Set your printer to actual Size (Do not use any of the "Fit to Page" options)
2. Print this page on plain paper
3. Confirm that the chart is exactly three and one half inches between the indicated lines
4. Cut out the Ring Size chart, and make a slit in the "Measure / Cut Slit Line"
5. Wrap the chart around your finger, pulling the loose end through the "Measure / Cut Slit Line". This should fit comfortably, not slip off, but not tight.
6. Your ring size will be indicated directly at this "Measure/Cut Slit Line"

Option B

1. Set your printer to actual Size (Do not use any of the "Fit to Page" options)
2. Print this page on plain paper
3. Confirm that the chart is exactly three and one half inches between the indicated lines
4. Take a piece of string and mark one part.
5. Wrap this string around your finger, allowing room for the knuckle, and have someone mark where the string crosses the line.
6. Hold the marked string against the chart.
7. Your ring size will be indicated.
