

# YOUR HANGING PLANTER

## INSTALLATION

If the individual segments of the planter have shifted during delivery, gently arrange back into place so that each segment slightly overlaps the previous. The screws at the sides can be tightened as necessary.

Hang the planter in desired location by either fixing the hanging loop onto a hook or suspending it using a cord.

Carefully place your no hole plant pot inside the planter so that it is level and the plant is tumbling out.

## CARE

Only use with a no hole plant pot. A smaller pot with drainage holes can be placed inside the no hole pot.

Wipe the exterior with a cloth when necessary.
