**Delta machines produce a large, crystal clear and gourmet cube, with a more modern truncated conical design that allows us to differentiate from the more classic "European" ice cubes.**

These great ice cubes will offer a great option to savor your drinks, because they take longer to melt with its non-conventional larger shapes. They are the most desired ice cubes for hospitality professionals, mixologists and upscale minded consumers, ideal for the most discriminating in tastes for soft drinks and spirits.

The Delta range incorporates the new R290 gas cooling system, which improves machine efficiency and makes them more sustainable.

ITV's patented "Spray Bar Nozzles" with Horizontal Evaporator Plate design, force water to be sprayed up under pressure, avoiding trapped gases, and not allowing calcareous build-up. You achieve the most perfect, individual, transparent and crystal-clear ice cubes.

Delta Series are specially designed for small-space applications, such as bars, guest room floors, refreshment break areas, etc. You also save space, thanks to a front ventilation system, with easy accessibility for cleaning and servicing.

ITV Under-Counter Ice Machine SPIKA NG 130, which produces full and half dice ice cubes and is specifically designed to meet the needs of businesses, restaurants, and grocery stores. The strong Inox frame allows for a reliable and solid machine structure in four columns with an AISI 304 stainless steel frame so you know your machine is built to last.

The Smart Front Ventilation System (SFVS) offers built-in installation options for the unit, plus you can easily access service and installation parts by removing each panel separately. An advanced electronic control system allows for performance optimization in extreme climates. Plus, this model uses natural gas R290 with very low global warming potential, further reducing energy consumption costs. And don't forget about the "Never Stop" motor pump - developed by ITV with no seals to reduce deterioration in hard water! Its LED on/off switch adds convenience while its PCB mounted at the bottom provides additional support.

**Experience maximum durability and easy maintenance when you choose the ITV Under-Counter Ice Machine SPIKA NG 130.**

WITH  
POWDER COATING

True can powder coat the interior and exterior of most models in a wide variety of standard and custom colors. True's powder coating process includes a superior metal pretreatment system that maximizes the adhesion of the powder coating to the metal, giving the surface a smooth, more even finish and preventing chipping. True currently offers more than 20 different RAL colors for you to choose from. Having multiple color options allows you to create a unique piece of refrigeration equipment to fit your style and design.

MD2000HT is a high temperature door-type pass-thru dishwasher, with a washing capacity of up to 55 racks per hour. It is 208-240v and comes standard 3-phase (but can be field converted to 1-phase). You're able to install this machine in either corner or straight through operation. And its built-in boost can be configured for both 40° and 70° rise.

Keep up with the high demands of your kitchen while providing customers with exceptionally clean, sanitized dinnerware with the Moyer Diebel 383HT High Temperature Undercounter Dishwashing Machine. This highly energy efficient commercial dishwasher uses only 0.84 gallons of water per rack and has the capacity to clean up to 30 racks in an hour! Each cycle only takes 120 seconds to complete, so you'll never find yourself behind on cleaning dishes, glasses, and other cookware.

Moyer Diebel's Nexus N900 is an undercounter, high-temperature dishwashing machine with a built-in booster heater. It cleans 24 racks per hour with a 105-second cycle time, and comes complete with one peg tray. Made in Canada for performance, efficiency, and longevity, this model features an exclusive 30 amp breaker machine as well as a highly effective 5kW booster heater. The Nexus Safeguard monitors and assures 180° Fahrenheit (82° Celsius) is reached in the final rinse cycle to meet NSF rated sanitization requirements.

Keep up with the high demands of your kitchen while providing customers with exceptionally clean, sanitized dinnerware with the Champion 501HT High Temperature Undercounter Dishwasher. This efficient commercial dishwasher uses only 1.5 gallons of water per rack and has the capacity to clean up to 21 racks in an hour! Each cycle only takes 141 seconds to complete, so you'll never find yourself behind on cleaning dishes, glasses, and other cookware. Ideal for heavily soiled loads, the 501HT operates on a fill and drain principle, meaning the previous cycle's rinse water is always reused for the next cycle's wash water.

Experience unparalleled efficiency and sanitation with The Champion Moyer Diebel DF commercial glasswasher. Featuring upper and lower wash and rinse arms, every glass undergoes thorough cleaning, while a final rinse with fresh, cool water ensures immediate usability. The 3-pump dispensing system precisely injects rinse-aid or sanitizer, optimizing resources with each cycle. Capable of processing approximately 1200 glasses per hour, this powerhouse combines speed with efficacy. Standard features include built-in dispensing pumps, an electric tank heater, and a glass-activated on/off function, all controlled within a durable stainless steel chamber. With its comprehensive wash and rinse spray system, our glasswasher guarantees pristine results every time, making it an indispensable asset for bars and restaurants seeking top-tier hygiene and efficiency.

Contact s.t.o.p for a quote today

Featuring an intuitive design, this beverage dispenser is designed to offer everyday transport and storage of your most popular hot or cold beverages, while providing an incredibly durable design at the same time. A drip-proof recessed spigot allows for convenient access, and included self-adhesive beverage labels ensure quick identification of contents by on-the-go guests.
