Hi, I have a hp pavilion dv6 7050ca laptop and I cannot open Hp coolsense. I searched around and found that my problem was my hp support assistant. When I open hp support assistant it automatically crashes and says windows is finding a solution to the problem. Now I downloaded the fixit by microsoft and it apparently got hp support assistant to uninstall, but download I open hp recovery manager to try and reinstall it. And how do I get Hp support assistant and hp coolsense to work? Please help me as I really want both of those coolsense to work! Last windows had folder with over 4000 files needed opened to execute them and load them into a program. General Discussion Hi Win7 Ultimate I hope I can explain this clearly. When I go to an Open or Save dialog box in any application and I click on any folder any where in Windows outside of the application, the Save as. General Discussion Chrome goes to a page that never loads then hangs and the Java Control panel won't open just the box frame of it will show. I've done just about everything I possibly can to remove java from the computer with exception to a re-format; something I'd rather bit have to do. Software I am searching for recommended free open source software, that handles open pgp encryption. I do not know what to call the software, so instead I will describe it. I am looking for software, that can make open pgp keys, import public keys, and encrypt and decrypt open pgp encrypted files. Software For a while my windows 7 64 bit would open my images in Documents. Now when I try they appear as a garbled strange format. This is a problem for me since I often need to add images to document Newsletters I send out.
