

Program fire stick without remote

Description:

Work your way down to Bluetooth and enable it. I was messing with kodi settings and switched resolutions to one that is not supported and now all I get is a screen blinking with unsupported mode in a blue box. Discover that most content is geographically controlled and cannot be viewed and settle in for a season of Man in the High Castle. It learns by distinguishing your voice. I use it only as a backup! I already know I can fool my fire stick to think I'm online.

Without that voice search does not work directly inside individual applications such as Netflix. A few months after I got my fire stick the remote stopped working, I thought it was without, changed the batteries but nothing. It without great at first but as days went on it would take a long time to find and connect to the fire stick. I tried my controller again which magically worked again. Again same problem with the app, it can connect right away at times. Sometimes I have to try and connect 3-5 times remote closing and opening the app. Other than getting connected the app works great! Happymesa91 This App is great if your batteries on your physical remote go out or if you lose your remote. There are two main issues that I have with this App. The first one are connectivity to the actual fire stick. Developers need to please fix that!
