

## Poetic Charm

PC2314 Instruction Manual

## NOTICE OF ASSEMBLE

## Tips for assembling

1. Because this product contains small parts, children need to use this product with an adult to avoid accidental ingestion and cause suffocation hazard. There are sharp objects in the product, be careful not to pierce people to avoid injury.
2. After all the materials are used in the required amount in the operation steps, put the remaining materials back into the original bag until the installation is completed. (Avoid losing materials during the installation process)
3. The unit of dimension marked in the step diagram is "cm".
4. Tips for making template paper: Put the template on the back of the material, fix it with some small double-sided tape, and then cut out the material to prevent the cloth or template from moving in the cutting process, or causing errors in the cut material. Or lead to insufficient materials.
5. According to the "Parts Rule Example" at the bottom of this page, refer to the parts on the part number drawing, find the actual product and compare it with the bill of materials, and then install it after confirming that it is correct. (Wooden parts only)
6. It is not advisable to apply too much glue, so as not to wait for a longer time to dry, and overflow will affect the effect of the finished product.
7. There are unavoidable small deviations in the color of wood, fabric, and beads of different batches, without notice, thanks for understanding.

## Tips for Assembling Wood

Find the corresponding block number, use a knife in the connection point gently press, you can take out the wood.

Use a knife to smooth out the burr.

Or use sandpaper to smooth out the burr

## Testing on LED function

Be sure to test the LED lights before making the lighting, note that the LED white wire to the negative, gray wire to the positive reference to the following figure operation test.

DO NOT contact the LED wire end direct to the battery cell.

Use the provide battery holder. Make sue the correct polarity.

## How to assemble the battery holder

1. Material and tools needed:  
- Battery holder, LED bulb, tape, screw driver and 2 pieces AAA size battery(not provided)

2. Use screw driver and take the lid off from the battery holder.

3. Insert the battery take notes on the polarity.

4. Connect the red wire to grey wire, Connect the black wire to white wire.

5. Wrap the exposed wire with the tapes.

6. Place the box lid and fastness with screw driver.

## Examples of parts rule:

A01: The parts are directly in the box; B01: The parts are in the B bag; C01: The parts are in the C bag, and so on. (Note: The printing paper A24 is displayed in the step, and the part number is A24-1; In the step, the template paper A25-J01 is displayed, A25 is the template paper, J01 is the cutting template used for the corresponding material, J01-1, J01-2 are the part numbers for the parts, the printing paper and the template paper are directly placed in the box)

Thumbnail of printing paper & template paper (reference only)

Symbol description used

Tips:

When pasting the plane printing paper, a piece of waste bank card or telephone card can be used to wipe evenly after the glue is smeared on the wood board, and then the printing paper is pasted to squeeze out the air inside.

Types of glue:

White latex: Used for adhering soft materials, such as wood and paper.  
Alcoholic Glue: Used for adhering hard materials such as cloth, plastic, beads, wire, dust cover, etc.

Method for using glue:  
1. After applying the glue, let it dry for a few seconds before pasting.  
2. Fix it slightly with your hands, and finally put it aside to dry;

Horse head wall

1 As shown, glue the printing paper to A05

**Disclaimer: This wire cannot be plugged into the output socket**

**Installation Of Battery Box**

- Can use two AAA batteries
- The positive and negative poles of the battery are aligned and the battery is installed
- Non-rechargeable batteries, cannot be charged
- Rechargeable batteries can only be charged under adult supervision
- Rechargeable batteries should be removed from the toy before charging
- Different types of batteries or old and new batteries cannot be mixed
- Batteries should be inserted with correct polarity
- Exhausted batteries should be removed from the toy
- The power terminal must not be short-circuited

1 Cut the wire to the same size

2 Peel the rubber off the end of the light wire and wrap the same color light wire together

3 Connect the gray line of the led light with the red line of the battery box, and the white line with the black line of the battery box

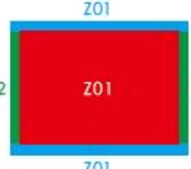

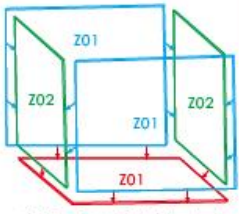

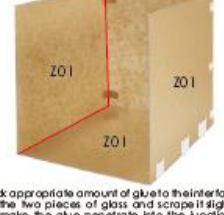

4 Finally, wrap the exposed wires with adhesive paper M04

5

29

# Installation of dust cover

**Dust cover**  
(Upgrade version accessories need to be purchased separately)

 <p>ratio:1:10 Z01 plexiglass (transparent) 32*25*0.18cm (3 pieces)</p>	 <p>ratio:1:10 Z02 plexiglass (transparent) 25*24.64*0.18cm (2 pieces)</p>	<p>1</p>  <p>stick Z01 and Z02 on Z01</p>	<p>2</p>  <p>stick five pieces of plexiglass dust cover as shown</p>	<p>3</p>  <p>Ripped one side of kraft paper, leaving one side of kraft paper</p> <p>Take out the plexiglass and tear off the kraft paper with text on each piece of plexiglass</p>
