

Lansinoh®

Lansinoh® Breastmilk Collector

The Lansinoh® Breastmilk Collector offers a simple way to collect precious breastmilk, so moms can save every last drop.

- Fits securely to the breast & creates natural suction for hands-free use
- Prevent spills with secure suction base and neck strap
- Comfortable, soft and easy to clean – made from 100% silicone
- Easy-pour spout helps transfer every drop of breastmilk into a Lansinoh® Storage bag or bottle
- Storage cap keeps collector clean when not in use
- Suitable for all breast sizes

Lansinoh® Breastmilk Collector

Lansinoh® understands that it's common for one breast to leak when mom is feeding or pumping from the other breast. But every drop of breastmilk is precious and that's why we designed the Breastmilk Collector.

The Lansinoh® Breastmilk Collector provides a simple solution, allowing mom to collect breastmilk that may have otherwise been lost, enabling her to focus on bonding with baby.

Using natural suction, the Breastmilk Collector gently secures to the breast for hands-free collection of leaking breastmilk. Made from 100% soft flexible silicone, it's comfortable to use and easy to wash.

A handy neck-strap and suction base add extra security from spills so precious breastmilk is kept safe. Lightweight and portable, the Lansinoh® Breastmilk Collector even has a storage cap to keep it clean when not in use.
