**DIAMOND TECHNOLOGY**

Diamond coated plates glisten and glide smoothly throughout hair.

**TOURMALINE TECHNOLOGY**

Crushed from precious gemstones, Tourmaline crystals emit negative ions that quickly seal the cuticle layer and eliminate frizz for smoother, silkier hair.

**INFRARED TECHNOLOGY**

Heat penetrates the hair shaft and straightens from the inside; providing enhanced workability, desirable, and faster results, without the negative effects of standard high heat.

**TITANIUM TECHNOLOGY**

Helps remove harmful chemicals and toxins from the hair. Titanium is scratch resistant and extremely durable.

**NANO TECHNOLOGY**

Tiny particles are embedded in the flat irons plates. Nano Silver inhibits bacterial growth. Nano titanium causes heat to spread more evenly and adds shine by boosting ion output from the plates.

# H3000 COLLECTION ORIGINAL
