Included In Your Package
1. Rotating Base
2. Outer Leg with Angled Foot and Thumb Screws (3)
3. Inner Extension Leg (3)
4. Chains (2)
5. Blast Deflector
6. Cotter Pin
7. Bolt

Assemble the Tripod
Unpack the tripod and confirm the contents of the tripod assembly.

Slide the inner tube extension legs into each outer leg and adjust to the desired height. Use the thumb screws on the outer legs to tighten each leg into place. Insert the three legs into the rotating base and set the stand onto the ground.

Install the Cannon
1. Install the cannon onto the rotating base arm and slide the gas hose through the center of the base.
2. Install the blast deflector arm onto the cannon/base connection and secure with the included bolt and cotter pin.

Attach the Propane Tank
Attach one end of each chain to each side of the rotating base with the "S" hook. Loop the other ends through the propane tank lifting holes and back to each "S" hook. This will suspend the tank so that it can rotate with the cannon.

Secure the gas hose to the pressure regulator valve and install the pressure regulator onto the propane tank.

Upon detonation the cannon will rotate approximately 90° with each blast.

We’re Here to Help
Don’t worry, we’ve got you covered! Your cannon is backed by our 1-Year Manufacturer’s Warranty, which protects against any defects due to manufacturing.
