

2014+ Sea Doo Spark Oil Change

SKU(s): 804FC0240 (7100), 804FC0241 (300V)

INCLUDED PARTS

(2) Liters of Oil
(1) BRP Oil Filter
(1) Oil Filter Cap O-ring
(1) Paper Funnel

REQUIRED TOOLS

External Torx 8mm Socket
Siphon Pump

Step 1: This procedure can be done with the upper hull intact. It is slightly easier to access the oil filter housing with the upper hull off.

Step 2: Remove the engine access panel located on the left side of the hull. Remove the dipstick access panel located on the right side of the hull.

Figure 1

Figure 2

Step 3: Insert the siphon tube into the oil dip stick tube until it bottoms out. Start siphoning oil.

Figure 3

Step 4: Locate the oil filter and remove the (3) E8 screws. Remove the oil filter and oil filter cap O-ring. It is a good idea to siphon out the oil filter housing.

Figure 4

Figure 5

Step 5: Install the new oil filter cap O-ring onto the cap. Apply a small amount of oil onto the O-ring.

Figure 6

Step 6: Install the new oil filter into the housing. Install the oil filter cap. Apply Loctite 243 (blue) on the threads on the screws. Torque to 80 in-lbs.

Figure 7

Figure 8

Step 7: You will only be able to siphon 2.0 liters of oil out of your spark. Leaving about a liter left in the engine. Pour in 1.5 liters of oil. Start the machine and let idle for 15-20 seconds. Check your oil dip stick and add accordingly. Do not over fill.
