

EVP Steering Wheel and Quick Release Hub Kit

SKU(s): 925FC0265, 925FU0274

INCLUDED PARTS

(1) Steering Wheel

(1) Quick Release Hub Kit

REQUIRED TOOLS

Steering Wheel puller or Two Jaw Puller

24mm Socket

Flat Head Screwdriver

1/8 Hex Key

Torque Wrench

INSTALLATION STEPS:

Step 1 - Use a flat blade screwdriver to remove the center steering wheel Cover.

Step 2 - Use a 24mm socket and ratchet to remove the steering wheel nut.

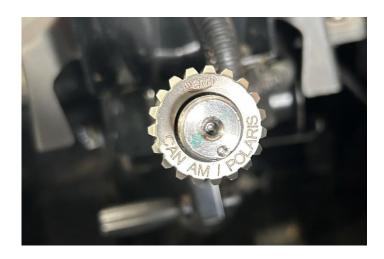

Step 3 - Install the steering wheel puller that is appropriate for your steering wheel and remove the wheel.

Note: It may be necessary to heat the center steering wheel hub with a heat gun to expand the material to ease removal.

Step 4 - Clean the steering shaft splines and install the splined couple on the steering shaft so the letters face the driver.

Step 5 - Install the coupler nut so the machined surface faces the splined coupler and torque to **66 Ft Lbs. (Polaris) and 44Ft Lbs. (Can Am)**.

Step 6 - Pull up on the black collar, align the splines with from the quick release hub with the splined coupler. Release the collar and make sure the hub has clicked into position.

Step 7 – Center the steering wheel over the hub, install the 6 10-32 screws and torque to **30 In Lbs**.
