

X3 Launch Control Switch

SKU(s): 705FC0010

INCLUDED PARTS

(1) EVP Launch Control Switch

INSTALLATION STEPS:

Step 1: Locate the dash mounted override switch to the right of the steering wheel (circled in red – left figure). Pop the switch out of the dash by pressing from behind and wiggling. If the switch does not pop out easily, press down the four locking tabs while pushing the switch out (two of the tabs are indicated using red arrows, the other two are located on the bottom side of the switch – right figure).

Step 2: Unplug the override switch and plug in your new EVP launch control switch. Next, press the switch back into the dash to complete the installation.

How to Use the EVP Launch Control Switch:

The EVP launch control switch allows operation of the gas pedal and brake pedal at the same time from a standstill to launch the car hard for drag racing.

CAUTION: The switch also disables the reverse gear speed limiter.

When in the “UP” position, the launch control feature is ON.
When in the “DOWN” position, the launch control feature is OFF.

**ON****OFF****Launch Control use:**

Press brake and apply throttle to raise engine rpm. Release brake and apply full throttle for a launch start. **CAUTION:** Extended time on Launch Control or very high rpm launches can damage drive belt. Evolution Powersports is not responsible for belt damage from launch control use.
