

X3 Steering Wheel Launch Control Push Button

SKU(s): 702FC0031 (OEM), 702FC0038 (EVP)

INCLUDED PARTS

(1) Steering Wheel Launch Control Button Harness
(2) Zip Tie
(1) Momentary Launch Switch
(1) OEM or EVP Steering Wheel Mounting Plate

REQUIRED TOOLS

T 15 & 30 Socket
13mm Open End Wrench
Drill Bit

Step 1: Remove the driver side upper dash by removing (7) T-30 screws and (3) push darts. One push dart is under the dash located in front of the key fob. It helps to tilt the steering column all the way down.

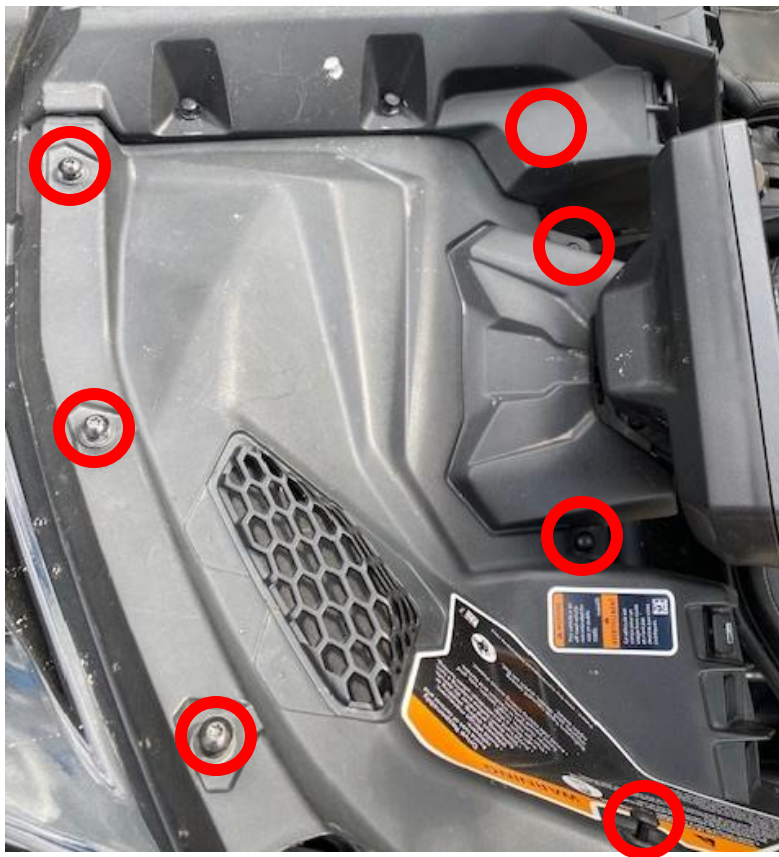

Figure 1

Figure 2

Step 2: When removing the front dash its best to unclip the front harness clips and remove the front electronic suspension module (if equipped).

Figure 3

Step 3: Locate the break switch connector. The female end is stuck to the frame, unplug the male. There is one tab (that you cannot see) on the front side. Press in and remove.

Figure 4

Figure 5

Step 4: Install the supplied harness into the OEM brake switch harness.

Figure 6

Step 5: Locate where you want the momentary launch switch, push out the blank. Push the harness through the empty port, install the switch to harness, push the switch into the dash until fully seated.

Figure 10

Step 6: Install the push button through the mounting bracket, tighten lock washer and nut. You can mount the bracket on the left or right side of wheel. For the OEM steering wheel drill pilot holes and install with supplied hardware. For the EVP wheel, remove the (6) screws on the wheel and install behind the wheel.

Figure 11

Figure 12

Step 7: Plug the harness into the button, make sure it snaps into place. You can zip tie the excess coil to the steering column.
