How to find out your RING SIZE

BEFORE MEASURING

Before printing, please make sure the page is set to 100% and use a ruler to measure the bars shown on the right.

The following bars must be exactly 1 inch and 10mm

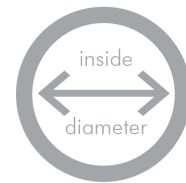

MEASURE YOUR RING

(Based on standard U.S. ring size)

You can measure your ring against our Ring Scale shown below. To measure your size accurately, place your ring on top of the circle.

Make sure to match the diameter of the **inside** of your ring.

If your ring falls between two sizes, please choose the larger size.

MEASURE YOUR FINGER

When measuring, please avoid using any material that can stretch or twist, as they will cause inaccurate measurement.

INSTRUCTIONS

1. With the appropriate material, wrap around your finger, so that it is not too tight nor loose.
(remember to keep your knuckle in mind!)
2. It is best to measure your finger when it is warm at the end of the day, as when your fingers are cold it will lead to smaller size measurement
3. Repeat measuring several times for an accurate size reading
