

Introducing the 2024 French Foundry Catalog #5!

Smith Woodworks and Design has been the exclusive importer and distributor of French Foundry, a curated collection of traditional metal hardware from France since 1994.

In addition to cabinet and furniture **knobs and pulls**, the *ferrures de style* / “stylish fittings” for furniture and doors includes

bail pulls
ring pulls
backplates
escutcheons
hinges
bolts
locks and keys
door levers
doorplates
door knockers.

The French Foundry collection pieces are known for their **unique “living finishes,”** a timeless look and feel unlike mass-produced hardware. The living finish is not plated, sealed or coated, for an antiqued and timeless glow that will continue to age naturally (see Catalog p. 2).

Nice Knobs from France, a selection of French Foundry knobs, complements our **Nice Knobs** comprehensive collection of fine wood knobs and pulls.

The following businesses are sources for all French Foundry products in Catalog #5.

Display boards, where French Foundry items can be seen and touched, are at these locations.

Catalog # 5 (2024)

getknobs@niceknobs.com

nice knobs!

Wood Knobs and Pulls
for Cabinets and Furniture

All of our French metal hardware pieces, except the pewter ones, have a living finish. To reproduce the effects of time, environment, and use, the metal surfaces are treated to achieve an authentic antique patina. The living finish is not plated, sealed, or coated, so it will continue to age naturally.

Rustic Patina

These Iron pieces have been chemically aged and rusted, then tumbled, waxed, and rubbed to achieve an authentic antique patina.

Natural Brass

These solid brass items are chemically tarnished and lightly buffed and waxed to produce a true vintage patina. Natural brass pieces will continue to age naturally, and can be polished periodically if desired.

Hammered & Blackened

These steel pieces are heated on the forge to create a black carbon surface, then hammered while the metal is soft. They are then rubbed with pigmented wax to produce a dark iron finish with pewter highlights.

Pewter

Our pewter knobs & pulls are steel with dark glazed accents and have been coated with a durable finish. This is not a living finish.

French Foundry Furniture and Cabinet Hardware – Finishes....2

Knobs/Ring Pulls and Backplates (any combination possible – parts sold separately)	4, 5, 6, 7
Escutcheons (backplate with keyhole)	4, 5, 6, 10,11
Bail Pulls (sold in units)	4, 5, 6
Knobs	4, 5, 6, 7
Cabinet Pulls	5, 6, 7, 8, 9
Refrigerator Pulls	8
Chest Lifting Handles	9
More Backplates and Escutcheons	10, 11, 12, 13
Furniture/ Cabinet Locks	14, 15, 16
Keys	17
Hinges	18, 19, 20

DHS-RP

For overlay doors with 1/4" projection from the face frame.

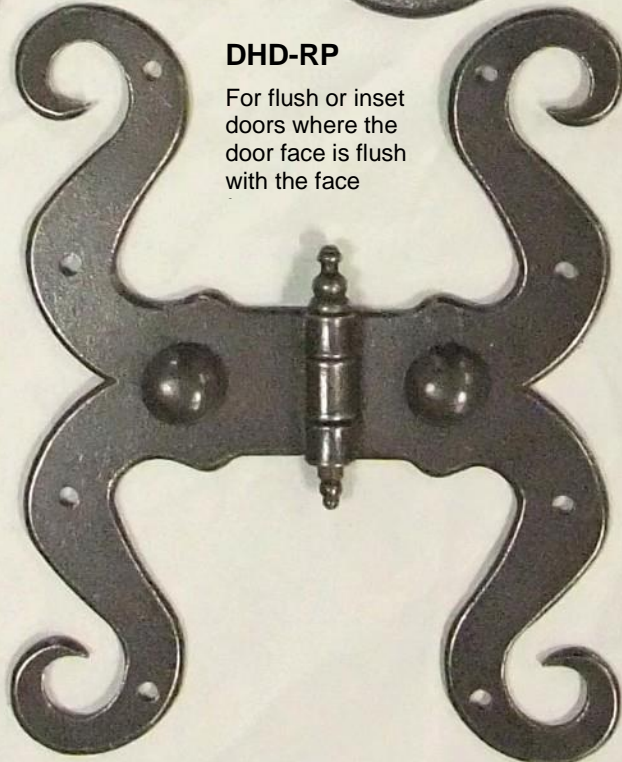

DHSL-RP

For overlay doors with 1/2" projection from the face frame.

DHD-RP

For flush or inset doors where the door face is flush with the face

DHS and DHSL hinges mount to the face frame using a bolt just below the post and a screw through the bottom of the tail.

The leaf is surface screwed and also fastened with a decorative round head iron nail.

For inset doors, we recommend that these **fiche hinges** be mortised deep into the edge of the face frame as shown here. The mortise is fully hidden by the hinge barrel when the door is closed.

The side top leaf may need to be trimmed, depending on the thickness of the door. This is easy to do with a hacksaw. In this instance new screw holes need to be drilled in the top leaf.

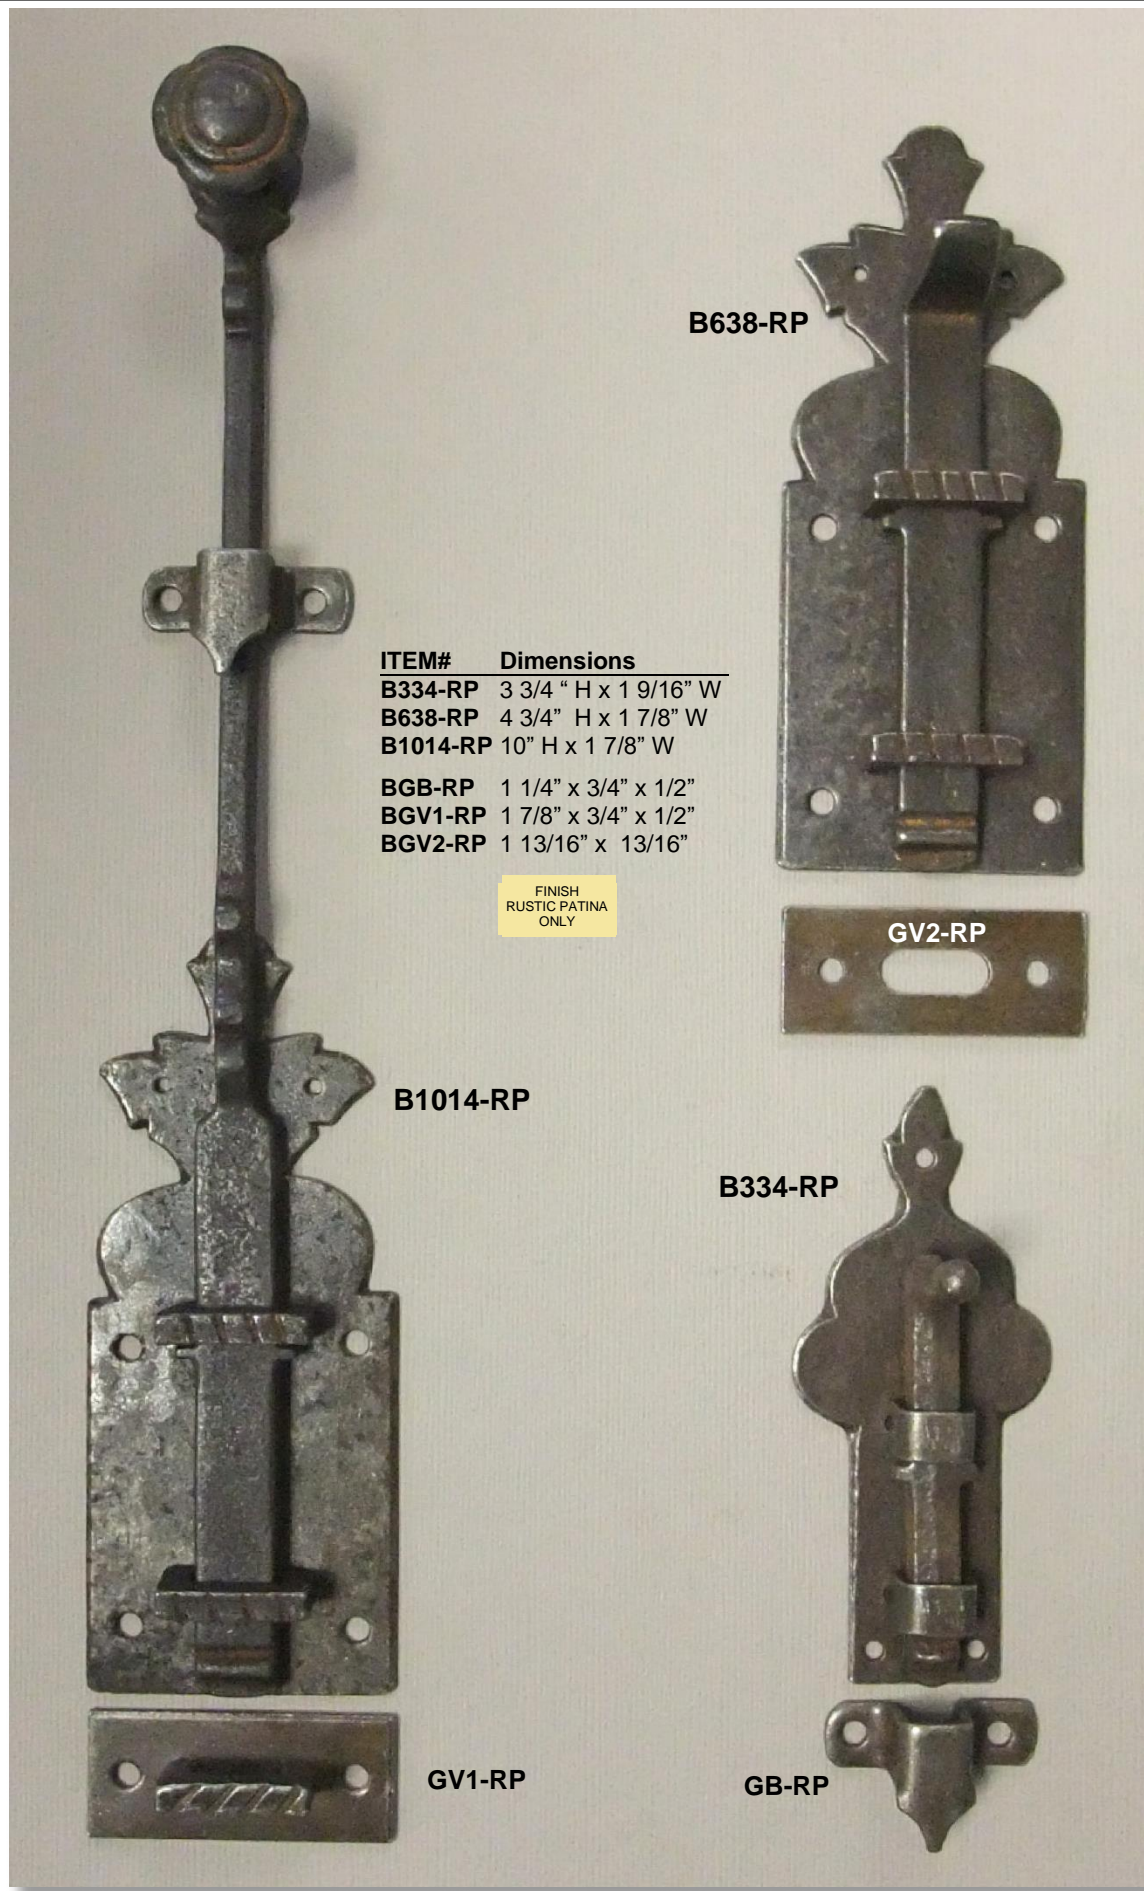

Another method for mounting inset doors is to swap the top leaf of a right-hand hinge with that of a left-hand hinge. This will align the top and bottom leaf in the same plane. The resulting hinge can be mounted in a no-mortise fashion with each leaf surface-mounted to the face frame and door edges.

The **S2000 Rim Lock** is for use on full sized interior architectural doors. It has a passage latch operated by a lever, a dead bolt operated by the key, and a privacy bolt operated by a tab on the bottom of the lock.

The backset is 2 3/8". The lock mounts on the inside of a door that swings in and is used in conjunction with two levers (page 23), a door escutcheon (page 24+25) and an 8 mm spindle, all sold separately.

One key, long enough for doors up to 2 2/8" thick, are included with each lock. (Custom keys can be for thicker doors.)

ITEM #	DESCRIPTION	HAND	DIMENSIONS
S2000L	Rim Lock	Left	5 1/4" W (includes keep) x 4 1/2" H x 1" depth backset: 2 3/8"
S2000R	Rim Lock	Right	
SPIN 425	Lever Spindle		4 1/4" long, for doors up to 1 3/4" thick 8 mm square spindle
SPIN 600	Lever Spindle		6" ex-long, for doors from 2" to 3 1/2" thick 8 mm square spindle
SPIN-DUM	Dummy Spindle		1 1/4" diam. Plate 1 1/4" projection 8 mm square spindle

Heavy-duty tubular latches, which work with our levers on the following page 23, are available from www.batonlockusa.com. (Do ask, but our stock is limited).

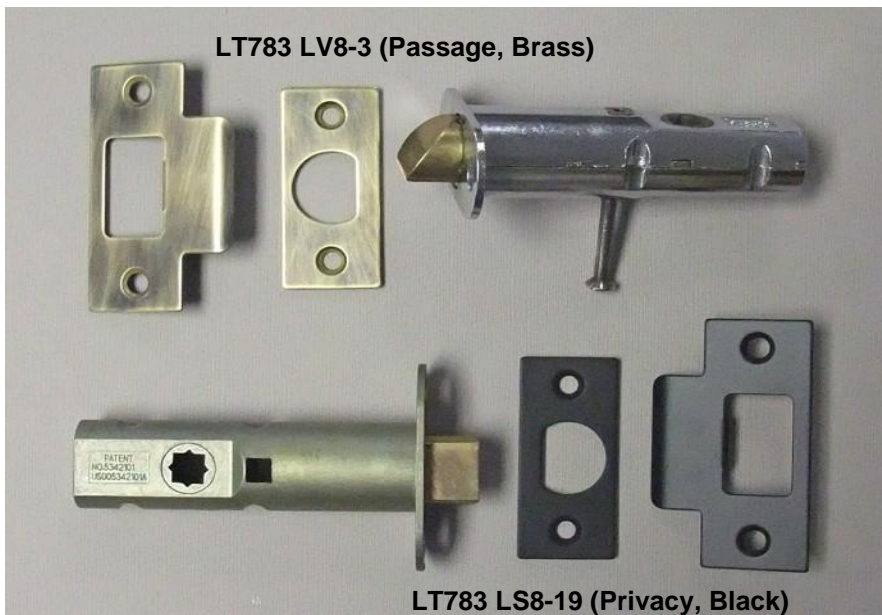

The spring is extra strong and only a 28-degree downward rotation is required to retract the bolt. The latch bolt is reversible to work on left- or right-hand doors. These latches take an 8mm spindle (shown above) on the square. They are available in privacy and passage. We suggest a trim finish in brass or matte black.

The latch comes with a face plate and T-strike; a dust box and mounting screws (*not shown*) are also included.

For these tubular latches, see **Baton Decorative Door Hardware, Catalogue, page L08**. Their item numbers for latches that fit our levers are provided here:

BATON ITEM #	Backset	Function	FINISH
LT783 LS8- 3	2 3/8"	Passage	Brass

LT786 LV8- 3	2 3/4"	Privacy	Brass
LT786 LS8- 19	2 3/4"	Passage	Black
LT786 LV8- 19	2 3/4"	Privacy	Black

LT783 (2 3/8" backset) Tube = 3 7/16" long x 31/32" diameter
 LT786 (2 3/4" backset) Tube = 3 13/16" long x 31/32" diameter

These levers are compatible with the locks on page 22 and the escutcheons on page 24 and 25. They mount on an 8 mm spindle (page 22) on the square and fasten with a set screw.

Our levers are sold individually, not in pairs.

Wood Species:

The wood species we stock are coded below and appear under each knob's picture to designate what species it is available in.

AL = Alder	PN = Eastern White Pine
AS = Ash	MH = Genuine Mahogany
BR = Birch	MP = Maple
CH = Cherry	OK = Red Oak
HK = Hickory	WO = White Oak
TM = Tiger or Curley Maple	WL = Walnut

Finish: All our wood knobs and pulls are unfinished.

Variation in Appearance:

The appearance of the wood in one knob can vary from the wood in another, even within the same species. This variation can be in color and grain pattern. We attempt to select knobs and pulls that match as well as possible when packing an order.

End Grain vs. Face Grain:

In an end grain knob the grain runs from top to bottom. In a face grain knob the grain runs from side to side across the face of the knob. The difference is purely aesthetic. Grain direction does not affect the functionality or durability of the knob.

Mounting Screws:

- We recommend wood screws as the strongest and most effective way of mounting most of our wood knobs and pulls. They are available for purchase separately.

- Most of our screw-on knobs are predrilled for wood screws. See sizes required --#8, #10 or #12-- and available lengths in chart on the right.

- The predrilled holes are 3/4" deep except the MC knob and LNP pulls, which have 1/2" holes. To determine the screw length, add the cabinet door/drawer thickness to the depth of the predrilled hole (3/4 or 1/2").

- Only the LP knobs and ARC 300 and ARC400 pulls have inserts due to the manufacturing process.
