Dräger. Technology for Life®

Respiration is our inspiration.

In addition to N95 respirators, Dräger offers a wide range of air-purifying respirators, along with fixed and portable gas detection equipment to help protect workers from hazardous gases and vapors. With unmatched expertise, we can assess and implement safety solutions for every workplace.

Ähhhhh.

Designed for maximum comfort, Dräger N95 respirators filter out **95 percent of non-oil based particulates**. And because they're **manufactured right here in America**, you don't have to wait on global supply chains to meet your needs.

Folded flat and individually wrapped, Dräger X-plore® 1750 respirators are ideal for a wide range of industrial applications. The N95s feature a soft hypoallergenic inner layer for consistently low breathing resistance.

Best of all, we're **stocked and ready to ship**. Choose a one-time order or select a monthly subscription plan for regular, reliable deliveries.

Working hard to help you breathe easy.

CoolSAFE™ filter material

Performance that makes a difference: CoolSAFE™ filter material produced from high-performance filter media ideally combines low breathing resistance and high filter performance in one respirator.

Hygienic individual packaging

Each N95 respirator is individually packed, ensuring it stays clean and hygienic.

VarioFLEX™ head harness

This continuous loop head harness is constructed from a stable, elastic, textile strap, which is easy to don and doff. The soft, tear-proof elastic is easily stretched to fit various sizes of heads and to prevent hair entanglement.

Flexible nose clip

Ensures a great fit in the most critical area.

Soft inner layer

Comfortable to wear, the inner material layer is not only soft and hypo-allergenic, but also repels moisture thanks to its hydrophobic properties, keeping breathing resistance constantly low.

Folded form

All Dräger N95 respirators are flat-folded, saving space and making them easier to transport.
