Quality Parts at Factory Direct Prices

www.raisman.com

Raisman[®]

RAISMAN is a global supplier in the outdoor power equipment parts industry.

Our Product Line covers most of the well-known OEM's in the market, presenting top quality aftermarket replacements at factory-direct prices.

Headquartered in Miami, Florida and with facilities in China, Argentina and Brazil, we cover all continents, maintaining active business with more than 250 customers worldwide.

Raisman started back in 1983 in Brazil where we established a carburetor factory with the sole purpose of making Ethanol resistant parts for small engines (the first in South America).

From our manufacturing facility in Brazil we continue to supply 2 and 4 stroke kits and carburetors to all large National Distributors in the US and Europe.

In 35 years, the company evolved to being a reliable source in the market, offering more than 3,000 parts to lawn & garden, forestry, marine, light construction and GOLF/ATV equipment.

At our Distribution Center in Florida we keep inventory of all products and process customized orders according to customer's packaging requirements, all at a world-class customer service level.

With the evolution of technology and the emergence of E-commerce, Raisman has adapted well to changes in the industry serving major online retailers and distributors by providing no-minimum order quantity and a fast turn-around.

A collection of automotive parts including filters, a tire, and suspension components. The image features a large red diagonal banner across the center. The background is a light gray with various car parts: a blue-topped cylindrical filter, a white cylindrical filter, a white rectangular filter, a black tire, a yellow wheel hub, and various suspension and steering components.
