

Bowaters

MODELS

Product Catalogue 2019

specialising in distinctive 16mm models

Introduction

Since 2015 Bowaters Models have been producing distinctive 16mm models here in the United Kingdom. We produce rolling stock and motive power kits which are 16mm:ft scale (1:19) and operate on 32mm and 45mm gauge track.

Our kits are predominately of MDF construction, making use of 3D printing where appropriate, to produce a model that is both affordable and easy to build. All kits come complete with bogies in the gauge of your choice, and Accucraft chopper couplings as standard. Our motive power kits only require electrics and batteries to produce a working model using a chassis from either PDF Models or IP Engineering. All kits are available without these items on request.

Our ranges currently cover railways from around the world including:

- Bowaters Paper Railway
- Ffestiniog Railway
- Sandy River and Rangeley Lakes Railroad
- Sittingbourne and Kemsley Light Railway
- South African Railways
- Welsh Highland Railway

We hope you enjoy this catalogue and find the information you need. We're always at the end an email if you have any questions.

Happy modelling!

Jon Reeves

Sandy River & Rangeley Lakes Railroad

The Sandy River and Rangeley Lakes Railroad was the biggest of all the Two Foot Railroads in the State of Maine processing the largest Motive Power, Passenger Fleet, Freight Fleet in addition to being the longest. It therefore looks ideal for the next range of products to add to the Bowaters Models Range of kits. We've selected a wide range of rolling stock covering all major types to allow a wide range of Sandy River trains to be run.

Core Specification	Technical
Laser cut MDF and plywood construction. 3D printed parts used where appropriate . Craftsman Plus Kits, minor details required to complete.	Length: Minimum Radius: Gauge: 32mm Skill Level: Craftsman

Bowaters Paper Railway Sittingbourne and Kelmsley Light Railway

The Bowaters Paper Railway was one of the busiest Narrow Gauge Railways in the United Kingdom operating 24 hours a day while the Paper Mills were in operation. A task it did from the early 1900s until the railway was preserved in 1969. Today, only a fraction of the once huge fleet survives either on their home railway or at Whipsnade Animal Park.

Our range covers a selection of the various Pulp Wagons that Railway operated along with 5 of the Staff Only Coaches.

Core Specification	Technical
Laser cut MDF and plywood construction. 3D printed parts used where appropriate . Craftsman Plus Kits, minor details required to complete.	Length: 365.67mm Minimum Radius: 38 Inches Suitable Gauges: 32mm/45mm Skill Level: Novice

Motive Power

Our range of Motive Power Kits will cover prototypes that we feel will complement our rolling stock range as well as providing suitable locomotives for your Garden Railway.

All our kits will be scale models and if possible, will operate on both 32mm and 45mm gauge track.

BME-001 SKLR 'The Tank' Battery Electric

This is a multimedia kit designed to run on 32/45mm track. It is based on the Bowaters Paper Company Battery Electric Locomotive which was used for shunting Pulp Wagons amongst other things at Ridham Docks. Sadly the Engine did not survive into preservation.

Comes complete with PDF Models Chassis and Accucraft Chopper Couplings.

Price: £80 MDF / £120 Plywood

Available from: Ourselves and Narrow Planet

BME-002 Freelance Battery Electric

This is a multimedia kit designed to run on 32mm track. It is based on the Bowaters Paper Company Battery Electric Locomotive which was used for shunting Pulp Wagons amongst other things at Ridham Docks. This version has a different cab and is smaller to make it more suitable for tighter curves.

Comes complete with IPE Chassis and Accucraft Chopper Couplings.

Price: £75 MDF / £95 Plywood

Available from: Ourselves and Narrow Planet

Accessories and Parts

From time to time, we remove options from our standard range however they will still be useful for scratch builders. Hence they are released here.

BMA-001 SKLR 14 ton Pulp Wagon Etches

Now available separately, the etches from the BMW-001 kit for people who have scratch built similar wagons. One etch set will cover both sides of the wagon. Contents includes 2 sides and 8 pockets. Instructions are included for assembly purposes. There will be a 2-4 week delay as these are produced to order.

Price: **£20 plus £4 P&P**

Available from: Ourselves

BMA-002 SKLR 14 ton Pulp Wagon Headstock

Now available separately, the headstocks from the former BMW-001P kit for people who have scratch built similar wagons.

Price: **£20.35**

Available from: Ourselves via Shapeways

BMA-003 SKLR 8 ton Pulp Wagon Headstock

Now available separately, the headstocks from the former BMW-003P kit for people who have scratch built similar wagons.

Price: **£27.97**

Available from: Ourselves via Shapeways
