## MODELS

### **Product Catalogue 2024**

### **Large Scale – Standard Gauge**

# Introduction

Since 2015 Bowaters Models have been producing distinctive 16mm models here in the United Kingdom. We produce rolling stock and motive power kits which are 2.5mm:ft Scale (1:120), 4mm:ft Scale (1:76), 16mm:ft scale (1:19), 15mm Scale (1:20.3), 7/8ths Scale (1:13.7) and operate on a range of gauges. We also produce standard gauge rolling stock and motive power kits which are Gauge 1 1:32 Scale or 10mm:ft scale (on request).

Our kits are predominately of MDF/Plywood construction, making use of 3D printing where appropriate, to produce a model that is both affordable and easy to build. All kits come complete with bogies/Slaters wheels, and Walsall Engineering Couplings as standard. Our motive power kits only require electrics and batteries to produce a working model using a chassis from either ourselves or IP Engineering. All kits are available without these items on request. We also offer complete train packs which are due to grow as our own future projects come to life.

Our ranges currently cover railways from around the United Kingdom including:

- Great Western Railway
- London Brighton and South Coast Railway
- London South Western Railway
- South Eastern Chatham Railway
- Southern Railway

We hope you enjoy this catalogue and find the information you need. We are always at the end an email if you have any questions.

Happy modelling!

# Great Southern Railway (Ireland)

The Great Southern Railways Company (often Great Southern Railways, or GSR) was an Irish company that from 1925 until 1945 owned and operated all railways that lay wholly within the Irish Free State (the present-day Republic of Ireland).

The period was difficult with rising operating costs and static to failing income. The early part of the period was soon after infrastructure losses of the Irish Civil War. The Emergency or Second World War at the end of the period saw shortages of coal and raw materials with increased freight traffic and restricted passenger traffic.

# Pullman Car Company UK

Pullman trains in Great Britain were mainline luxury railway services that operated with first-class coaches and a steward service, provided by the British Pullman Car Company (PCC) from 1874 until 1962, and then by British Railways from 1962 until 1972. Many named mainline service trains have subsequently used the word 'Pullman' in their titles, but most of these have been normal trains with increased first-class accommodation. Since 1982 however, some railtours have been operated by companies using Pullman coaches dating from the 1920s to 1950s to recreate the ambience of the heyday of Pullman travel.

# South Eastern and Chatham Railway

The South Eastern and Chatham Railway was formed from the working union of the South Eastern Railway and London, Chatham & Dover Railway which operated mostly in East Sussex and Kent. As both companies tended to compete in the same areas, a operating merger was only a matter of time for both companies to survive. The railway is particularly famous for the designs of its main CMEs, Harry Wainwright and Richard Maunsell (who later became CME of the Southern Railway).

# Southern Railway

The Southern Railway was one of the four big four companies formed from the 1923 Grouping. While it was the smallest of the 4, it was the only one to have most of its income come from passengers due to its relatively huge suburban network plus links to a number of the major continental ports. During the second world war due to its location being close to the front, the railway performed a vital role during the second world war transporting supplies to the front.
