Product Catalogue 2024

Large Scale – Narrow Gauge

specialising in distinctive 16mm models

Introduction

Since 2015 Bowaters Models have been producing distinctive 16mm models here in the United Kingdom. We produce rolling stock and motive power kits which are 2.5mm:ft Scale (1:120), 4mm:ft Scale (1:76), 16mm:ft scale (1:19), 15mm Scale (1:20.3), 7/8ths Scale (1:13.7) and operate on a range of gauges. We also produce standard gauge rolling stock and motive power kits which are Gauge 1 1:32 Scale or 10mm:ft scale (on request).

Our kits are predominately of MDF/Plywood construction, making use of 3D printing where appropriate, to produce a model that is both affordable and easy to build. All kits come complete with bogies in the gauge of your choice, and Accucraft chopper couplings as standard. Our motive power kits only require electrics and batteries to produce a working model using a chassis from either PDF Models or IP Engineering. All kits are available without these items on request. We also offer train packs with PDF Models and our own Motive power in which is due to grow as our own future projects come to life.

Our ranges currently cover railways from around the world including:

- Bowaters Paper Railway
- Bridgton and Saco River Railroad
- Burma Mines Railway
- Chattenden and Upnor Railway
- Ffestiniog Railway
- Isle of Man Steam Railway
- Sandy River and Rangeley Lakes Railroad
- Sittingbourne and Kemsley Light Railway
- South African Railways
- Welsh Highland Railway

We hope you enjoy this catalogue and find the information you need. We're always at the end an email if you have any questions.

Happy modelling!

Jon Reeves

Available from: Ourselves

Bowaters Paper Railway – 16mm

The Bowaters Paper Railway was one of the busiest Narrow Gauge Railways in the United Kingdom operating 24 hours a day while the Paper Mills were in operation. A task it did from the early 1900s until the railway was preserved in 1969. Today, only a fraction of the once huge fleet survives either on their home railway or at Whipsnade Animal Park. Our range covers a selection of the various Pulp Wagons that Railway operated along with 5 of the Staff Only Coaches.

Core Specification	Technical
Laser cut MDF and plywood construction. 3D printed parts used where appropriate. Craftsman Plus Kits, minor details required to complete.	Length: 365.67mm Minimum Radius: 38 Inches Suitable Gauges: 32mm/45mm Skill Level: Novice

Optional Extras
Windows Addon - £10 per appropriate kit Steel Wheels Addon - £15 per appropriate kit

Isle of Man Steam Railway

The Isle of Man Steam Railway is one of the best known narrow gauge railways in the United Kingdom. Even today, it still runs with the original coaches and original motive power in regular service. With heavy commercial support from Accucraft, we're decided to produce a small number of coaches to run with these engines. These coaches will come complete with bogies that can be built in either 32mm or 45mm gauge along with Accucraft Chopper Couplings. We are also hoping to include appropriate decals with these kits.

Core Specification	Technical
Laser cut MDF construction. Come complete with Bogies in the gauge of your choice with Accucraft Chopper Couplings.	Length: 390mm Minimum Radius: 48 inches Gauges: 32mm/45mm Skill Level: Novice

Optional Extras
Windows Addon - £10 per appropriate kit (Excludes FR Coach 150 and WHR Coach 2100)

Isle of Man Steam Railway

Available Kits:

Sandy River & Rangeley Lakes Railroad

The Sandy River and Rangeley Lakes Railroad was the biggest of all the Two Foot Railroads in the State of Maine processing the largest Motive Power, Passenger Fleet, Freight Fleet in addition to being the longest. It therefore looks ideal for the next range of products to add to the Bowaters Models Range of kits. We've selected a wide range of rolling stock covering all major types to allow a wide range of Sandy River trains to be run.

Core Specification

Laser cut MDF and plywood construction.
3D printed parts used where appropriate.
Craftsman Plus Kits, minor details required to complete.

South African Railways

The South African Railways 2ft gauge systems were some of the biggest and highest capacity in the world. Making significant use of Beyer Garratt locomotives and other massive engines such as the NG15 tender engines alongside the at the time modern Class 91 diesels, these lines carried huge amounts of both passengers and freight into areas otherwise isolated from the rest of the country. For our range, we have mostly focused on the stock of the Avontuur Branch which means all our kits will match our upcoming Class 91 perfectly!

We have a number of coaches, 2 open wagons and 3 brake vans in the range. The entire range is suitable for both 32mm and 45mm gauge lines and can also operate alongside the Accucraft NG15 and NGG16 with ease. The kits will be available with bogies in the gauge of your choice and with Accucraft Chopper Couplings. We are also hoping to include appropriate decals with these kits.

Core Specification	Technical
Laser cut MDF construction. Come complete with Bogies in the gauge of your choice with Accucraft Chopper Couplings.	Length: 390mm Minimum Radius: 48 inches Gauges: 32mm/45mm Skill Level: Novice

Welsh Highland Railway

Our current range of kits are for a set of passenger coaches from the Ffestiniog and Welsh Highland Railways. The coaches covered are for 15 of the Welsh Highland Railway Modern Corridor Coaches in their current operating condition (as of January 2016). The coaches that are going to be produced are from the following WHR/FR Coach series:

- Semi Opens
- Saloons
- Service Coach
- Pullmans

For those who don't have the room for full sized coaches, we also offer a range of 3 'Shortie' Coaches which are all 75% the length of the full sized coaches.

Core Specification	Technical
Laser cut MDF construction. 3D printed parts used where appropriate . Include bogies, wheels and couplings.	Length: 580-680mm (430-460mm for the Shortie Coaches) Minimum Radius: 5ft but can do tighter by moving the Bogies outwards. Suitable Gauges: 32mm/45mm Skill Level: Novice

Optional Extras

Windows Addon - £10 per appropriate kit (Excludes Coach 2100)
Steel Wheels Addon - £15 per appropriate Kit
