- One off – 3 mm sheet of laser cut ply 45ft Bk Compo
- One off – 3 mm past sheets of laser cut ply 45ft Bk Compo

From the 'Fareham Carriage Works Designs' collection, created by Tony Armstrong, this series of body and under-frame 'kits' build into a 1:22.6 scale model of a London and South West Railway carriage. This is a Limited Edition series of G3 vehicles, never to be repeated, as the 'Fareham Carriage Works Designs' are normally for Gauge 1

The 'Fareham Carriage Works' designs are not kits: they are the plywood components necessary to build the bodies and under-frames of a vehicle. The designs are exactly as supplied to Tony Armstrong who created them to take the hard work out of scratch building carriages. They are not particularly difficult to assemble, but you need to be familiar with the type of vehicle to work out what some components are and how to assemble them. They are not like an Airfix kit where everything is numbered, and has 'Noddy' notes telling you exactly how to build it: though a recommended assembly procedure is included. Please note that some fitting/adjustment may be required during assembly – you can't just put the bits in a bag, give it a good shake, with the hope it will put itself together!

**Please note that we will be unable to help with any general enquiries about how to build these carriages.**
