

THE COUNTRY MITT

SIZE CHART:

SIZE	INCHES
S	6.5 - 8"
M	8 - 9.5"
L	9.5 - 10.5"
XL	10.5 - 12.5"

* To find your mitten size, make a loose fist, and measure the circumference around the top of your knuckles. The number of inches around your knuckles is your mitt size.

CARE GUIDE:

- While not waterproof, goat leather is more water resistant than other leathers.
- Dry them low and slow - avoid drying mittens under or near direct heat sources as it can dry out the leather, pulling out the natural oils present in goat leather (which keeps it supple & dexterous).
- Every now and then, condition your dry gloves in order to replenish the natural oils in the leather. We recommend not using petroleum-based products, try SnoSeal, Nicwax, etc.
