How to use Carrier Oils

Carrier Oils or base oils as they are also known are used to dilute essential oils before applying them to your skin, essential oils should never be applied topically without a carrier oil due to their potency.

Our range of carrier oils provide excellent benefits for your skin and are ideal for use in aromatherapy, body massage and facial treatments. Rich in vitamins, minerals and essential fatty acids which help to moisturise, nourish, soothe, and regenerate.

Are Carrier Oils safe for everyone to use?

Carrier oils don't carry the same cautions as essential oils and are gentle and safe for anyone to use. Assuming you are not allergic to the ingredient.
