Tea Tree Oil has a distinct, camphorous, medicinal aroma with cleansing, protective, rejuvenating properties, for mind and body.

Tea tree essential oil is the concentrated liquid compounds steam distilled from the leaves of the tree *Melaleuca alternifolia*, native to Australia. Australian aborigines are known to have used leaves for medicinal purposes for hundreds of years.

The oil is claimed to have valuable antiseptic and anti-fungal properties due to constituents called terpenoids. Tea tree is a well-known oil for cleaning and protecting the skin, and is popular for use in treating skin problems, infections and for foot care. The spicy, camphorous properties in tea tree oil are said to be useful for relieving congestion, and cold symptoms, and it is believed to soothe aching muscles and joints.

When added to bathwater Tea-Tree helps control bacteria. The powerful aroma of tea tree oil helps to relieve fatigue, improve concentration and clear the mind. Inspires self-confidence, enhances endurance and inner strength.

How to use essential oils

Massage – Both body and facial massage can benefit from the intoxicating aroma of essential oils. Always ensure that you add the essential oil to a carrier oil first, and never apply directly to your skin. A carrier oil, also known as base oil, is used to dilute essential oils before they applied to the skin.

Bathing – There is no better way to unwind than in an essential oil bath, calming oils like Lavender and Clary Sage are especially relaxing. Add 5-10 drops in a bath and disperse vigorously before entering the bath.

Steam inhalation – This is a really good way of helping to relieve blocked sinuses or congestion. Eucalyptus is one of the most popular oils for this. Fill a large bowl with hot (not boiling water), add 3-4 drops of your chosen oil then lean over the bowl placing a towel over your head and slowly

breathe in the until you start to feel relief.

Diffusers – There are many diffusers available, one of the most popular being an ultrasonic diffuser which uses water to create a fine mist. These are a great way of enjoying oils throughout the day in your home or office space. Citrus oils are particularly uplifting. Ideally leave your diffuser on for up to an hour at a time, leaving it off for a similar amount of time.
