

Actigreen

Product of a unique patented manufacturing process based on obtaining micro particles of calcite.

Actigreen is the first CO₂ supplement fertiliser.

Natural
Calcite

FERTILISER

POWDER fertiliser containing calcium and magnesium

Total Calcium (Ca): 29.8% w/w

Total Magnesium (Mg): 1.8% w/w

Crops recommendations

Crops	Rate /ha	Water Volume L/ha	Timing
Cereals	0.3 to 1.5 kg	100L min	1 application from second node to last leaf unfolded
Rice	0.3 to 1.5 kg		3 applications at 15-45-55 days after sowing on intensive Rice.
Zucchini, Cucumber,	0.3 to 1.5 kg	150L min	1 application from stage 4-6 leaves to 6-8 leaves
Potatoes Vegetables	0.3 to 1.5 kg		2 applications from tuber formation every 15 days
Glasshouse	0.3 to 1.5 kg	200L min	1 application on well developed foliage
Grapes	0.5 to 1.5 kg		3 applications: 15 days before flowering – 10 days after flowering and from stage fruit set to stage majority of berries touching.
Fruit trees	0.5 to 2 kg	150L min	3 applications during the development of fruit
Lettuce, Leafy Vegetables	0.5 to 1.5 kg		2 - 3 application during the vegetative phase
Tomato, Zucchini, Cucumber,	0.5 to 1.5 kg	150L min	3 - 4 applications – every 15 days
Melon	0.5 to 1.5 kg		Start from flower initiation 2-3 application at 15 day intervals
Berry fruit	0.5 to 1.5 kg		3 applications from beginning of flowering – every 15 days

INSTRUCTIONS FOR USE

For best results, use sufficient water to achieve an even crop coverage to the point of run-off.
 2. Gradually add the required amount of Actigreen and then add the rest of the water, maintaining agitation continuously. When combining with other components in a tank-mix, always add Actigreen last. Do not allow the mixture to stand without agitation.
 3. After spraying, clean and rinse the spraying equipment thoroughly.

MIXING

1. Fill the spray tank with half the required amount of water and start agitation.
 2. Gradually add the required amount of Actigreen and then add the rest of the water, maintaining agitation continuously. When combining with other components in a tank-mix, always add Actigreen last. Do not allow the mixture to stand without agitation.
 3. After spraying, clean and rinse the spraying equipment thoroughly.

SAFETY PRECAUTIONS :

P102: Keep out of reach of children.
 P202: Do not handle until all safety precautions have been read and understood.
 P261: Avoid breathing dust/fume/gas/mist/vapours/spray.
 P273: Avoid release to the environment.
 P501: Dispose of contents/container according to local/regional/national/international regulations..
 Replace the contents / container to an approved disposal center.

STORAGE

Store locked up

Keep in original container out of direct sunlight, tightly closed, in a safe place away from children, animals and foodstuffs. When stored appropriately, this product should keep for 2 years from date of manufacture. Protect from humidity

DISCLAIMER:

The manufacturer and vendors of Actigreen warrant the formulation to contain the specified active ingredients within accepted tolerance when packed. No warranty of any kind is made on the use of this material and no responsibility will be accepted for any damage or injury whatsoever arising from the storage, handling, application or use of this product/Store away from frost.

DISPOSAL

Do not empty into drains; dispose of this material and its container in a safe way. Refer to special instructions/safety data sheet.

COMPATIBILITY

Actigreen is physically and chemically compatible with many of the pesticides, growth-regulators and micronutrients that are in current usage, so it can be tank-mixed when timings coincide. Unfortunately due to formulation differences some tank-mixing combinations may be found to be physically incompatible. Always add Actigreen as the last component to any tank-mix. Carry out a small scale jar test prior to tank-mixing larger quantities when compatibility of components is unknown. Biological compatibility may vary depending on seasonal factors, crop conditions and growth stage as well as tank-mix partner. Regrettably therefore, no recommendations are available for the biological compatibility of tank-mixes or their safety to crops. Always read the product labels and follow the manufacturers' instructions for all products at all times. If there is any doubt at all, consult the manufacturers concerned.
