

Seed Name:	Seed Type:	Notes:	Lasting Period:
<b>Annual Ryegrass NR70 Dominate</b>	-Tetraploid grass and seed are larger so needs good sowing rate.	Very good after maize and where you have good fertility.	1 Year
<b>Italian Ryegrass</b>	-Diploid longer lasting grass	Good in mulched kikuyu land.	Subject to weather conditions etc, can often get 2 years from it.
<b>HE Perennial Ryegrass</b>	-Standard high endophyte diploid perennial.	Having been selling into Northland for many years. Stronger than Nui.	
<b>Special Perennial Ryegrass</b>	-Tetraploid perennial with good persistence if managed correct.	Very good stock growth rates on it.	
<b>White Clover</b>	-Medium – large leaf, very good white clover.		
<b>Seed Mix 87.5% High endophyte diploid perennial rye+ 12.5% medium/large leaf white clover.</b>	Standard high endophyte diploid perennial with medium – large leaf, very good.
