

Benefits of wool

NATURAL AND ANIMAL FRIENDLY

A sheep grows a new fleece each year so wool is a raw material, which can be gained ethically. It makes wool totally natural, renewable and cruelty free.

BREATHABLE

Wool easily absorbs moisture and releases it. This material creates a perfect ventilation without compromising its thermal efficiency. It will never be too hot or too cold underneath wool.

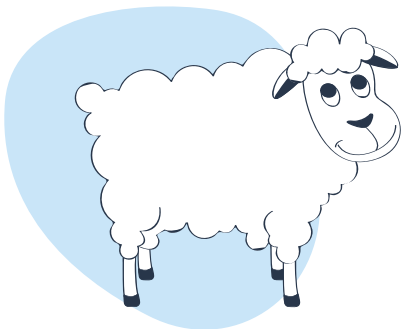

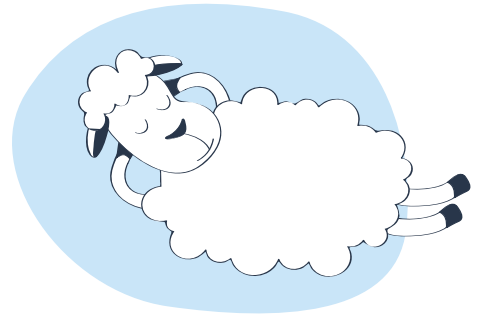

SAFE AND CHEMICAL FREE

Lanolin makes wool naturally flame resistant. This provides a safe sleep environment without using toxic chemicals.

COMFORTABLY SOFT

Natural softness of wool provides support for your muscles and helps relieve pressure points. Wool's fibres are also naturally elastic, making them resistant to wrinkling and sagging.

EASY CARE

Lanolin is a natural wool grease that sheep produce to be self-cleaning, bacteria-repellent and dirt-repellent. As a result, you don't have to worry about dust mites or other filthiness.
