OUR BRAND

We are proud to have launched the Australian designed and owned Kangarama. Material Science Company that uses Science-based Technology in developing innovative workwear. We wanted to provide 'wearable safety' that was durable, comfortable, whilst still being fashionable. Using science and innovative technology, Kangarama was born.

MAKE THE CHANGE

'MAKE THE CHANGE' encourages the community to make the change to workwear that is better committed to the environment and provides quality. It's backed by approved science and inhibits the growth of bacteria and viruses. Making the change is an easy decision.

BEHIND THE NAME

Kangarama is a completely unique word, created by us. Combining an iconic Australian animal, the Kangaroo, with the verbal sound of armour. Kangarama signifies an Australian brand with strength and protection.

ARMA TECHNOLOGY

WHAT IS IT?

Arma Technology inhibits the growth of viruses and bacteria encountered on Kangarama fabrics by rupturing the cell membrane of these contaminants with molecular spikes.

HOW IT WORKS

Conventional antimicrobial agents destroy microbes by way of entering the cells and interfering with the cell DNA. This often results in microbes developing resistance to chemicals and developing “fight back” strategies. Arma Technology instead kills microbes using the mechanical action of “Lysis”. Lysis by its definition is the breaking down of the membrane of a cell by mechanical action as opposed to genetic mutation.

Using Arma Technology innovation, the fabric develops molecular spikes un-harmful to human skin that rupture the microscopic bacteria and viruses, in effect killing the microorganisms that come into contact with the fabric.

Fabric developed using Arma technology has been tested up to 100 washes with independent labs indicating a reduction up to 99.9% bacteria and viruses.

To consider your safety, we have extensively tested the product for its safety. Product meets the requirements of ISO 10993. Testing for skin irritation and cytotoxicity shows no side effects of the fabric meaning product is safe to wear on daily basis without any negative impacts on your health”.

WHAT IS ESKAPE

ESKAPE is an acronym for six of the most common antibiotic resistant pathogens. These pathogens are deemed the major cause of life-threatening infections and can be transferred through surfaces, equipment and skin contact solidifying the importance of Kangarama’s innovative fabric.

SOCIAL RESPONSIBILITY

We have a responsibility to do our part in preserving our planet. This means reducing our carbon footprint, recycling and using sustainable materials whenever possible. We also need to be aware of the impact our business has on the environment and communities where we operate. We need to ensure that we are operating in a way that is socially responsible and considerate of the planet we call home.

More and more consumers are interested in supporting businesses that are environmentally friendly and socially responsible. By doing our part, we can show our customers that we are a business that cares about more than just profits.

We care about people and the planet, and we are committed to doing our part to make a difference.

ENVIRONMENTALLY FRIENDLY DYES

Oeko Tex is a well-known and trusted certification for product safety. When a fabric is awarded this, it means it has been tested by OEKO-TEX for harmful substances and declared safe for human use. Companies can not pay to receive these certifications therefore you can be confident that we are providing you with the safest possible product.

RECYCLED PLASTIC BOTTLES

Recycled polyester, often called rPet, is made from recycled plastic bottles. It is a great way to divert plastic from our landfills and repurpose and use polyester already in circulation. Research shows that during the rPet production less CO2 emissions are generated and less energy is required to produce compared to Virgin Polyester. It is a better sustainable alternative for our wardrobe. Our Recycled Polyester uses REPREVE yarn which is the world's leading brand in recycled performance fibre, the yarn has its own traceable footprint. Our scrubs come with the Tag and with this comes confidence that it is a positive purchase.

MANUFACTURING

Our Clothes don't produce themselves, human input is essential even with all the technology and machinery available. So it is important our Manufacturers are worker friendly. Our Manufacturer is Sedex Certified, it is necessary to ensure that the supplier with whom we are partnering is functioning in an ethical manner. Sedex conducts audits that comprises labour standards, health and safety, Environmental ethics, Business Ethics.

BYRON SCRUB PANTS

KW - P 0 0 3

Our Byron pants are designed with both comfort and style in mind. They feature an elastic waistband for a customisable fit and a slim, straight leg that tapers at the ankle. The tapered ankle adds sophistication, allowing the pants to be worn casually or formally. The side splits at the ankle add style and are designed to fit comfortably over a variety of footwear options.

With two side pockets, you can carry your essentials. These pants are durable and long-lasting. We have added a seam design around the crotch for improved functionality and ease of movement, which enhances all-day wear and comfort.

The versatile style allows it to be paired with a range of tops and shoes making it a must-have.

KANGARAMA CUSTOMISATION

Welcome to Kangarama customisation, we specialise in crafting custom Medical Uniforms that can be tailored to your unique needs and requirements. We are passionate about creating well-designed and functional uniforms that not only look great but also help to promote your brand.

Our Kangarama Technology and fabric allow us to create customised uniforms in a variety of colours, styles, and designs that best represent your brand and reflect the unique identity and spirit of your team. We offer high-quality custom sublimation printing services, we can create custom designs that truly stand out. Whether you need logos, patterns, or custom graphics, our sublimation printing process results in a permanent, high-quality print that won't fade, crack, or peel over time.

We use only the highest quality, eco-friendly fabric that is durable and comfortable, making your uniform a better option for the planet. Our current uniform range includes a variety of options for both men and women, including scrubs, lab coats, and jackets, so you can choose the uniform that best suits your needs.

At Kangarama, we believe that healthcare professionals deserve the best. That's why we work closely with our clients to ensure that every detail of their uniform is perfect. From the initial design to the final product, we take great care to ensure that our clients are completely satisfied and it has captured their vision.

Investing in custom Medical Uniforms from Kangarama is an investment in your brand and your team. Let us help you create a uniform range that not only looks great but also meets the functional needs of your healthcare professionals. Contact us today to learn more about our custom uniform services and how we can help you elevate your brand.
