INSTALLATION TIPS

Part Number: **ENG 911 964 993 TC PMS**

VR: 10-2020

Congratulations, you have acquired a Patrick Motorsports designed engine conversion part! This kit is specifically developed and refined throughout the years to offer best overall fit and performance.

Description:

Porsche 911 / 930 / Turbo Accelerator Throttle Linkage Cable Conversion Kit to 964 / 993 3.6L DME Engine. This unit is developed using the factory original equipment Porsche cable.

Application:

(1965-1989) Porsche 911 / 930 / Turbo to (1994-1998) Porsche 964 / 993 - 3.6L DME Engines

Designed to replace the original throttle cable assembly part numbers:

PCG 423 024 00 – Throttle Linkage

901 423 223 01 – Extension Rod

Installation:

- This cable will replace the solid throttle extension rod found in the chassis tunnel.
- This assembly features tubing to replace the solid extension rod and is used as a cable guide liner. Install under the throttle guide keepers to ensure smooth, reliable operation.
- Use the adjuster guide at the bulkhead to remove excess cable play. Adjust as necessary.
