

## TEMPERATURE SENSOR PT1000 SURFACE

Miniaturized temperature sensor PT1000; A-Class accuracy, suitable to measure the temperature of surfaces; linear characteristic and high response speed.

The extra small aluminum case makes it possible to install in a very confined space, like traditional thermocouples locations.

T (°C)	R (Ω)
-30	882,2
0	1000
50	1194
100	1385
150	1573,3
200	1758,6

### TECHNICAL SPECIFICATIONS:

- ◆ Material: Aluminum
- ◆ Measurement Range: -30 ÷ +200°C
- ◆ Accuracy: A Class, according to standard IEC60751
- ◆ Protection: IP67
- ◆ Weight: ≈ 6gr
- ◆ Cable length: 1000mm
- ◆ Connections: Spare wires, connector on request
- ◆ Dimension (mm):
