boat

WAVE VIVID

Thank you for choosing the boAt Wave Vivid as your fitness transformation companion.

Allow this manual to guide you through the functioning of your smartwatch. Please read it thoroughly before using it for a smooth sail. You may refer to these instructions for later use as well.

PACKAGE CONTAINS:

- boAt Wave Vivid x1
- USB Magnetic Charging Cable x1
- User Manual x1
- Warranty Card x1

CHARGING THE WATCH

The smartwatch must be charged before being connected and charge the watch with the in-box USB cable as a reference, using a 5V/2A adapter.

TURNING THE WATCH ON/OFF

To restart or turn the watch on/off, long-press the side button for 3-5 seconds. You can wake up the screen by lifting your wrist.

CONNECTING TO THE APP

1. Download the boAt Sync app on your phone. Available on both App Store (iOS 12.0 and above) and Google Play Store (Android 7.0 and above) OR

Scan [QR CODE] (Also available on the watch)

2. Connect the device with the boAt Sync app, ensure that the phone's Bluetooth as well as the GPS functionalities are turned on
3. Select boAt Wave Vivid on the home screen of the app and click pair to connect.
4. Once connected, you will get an alert to connect with boAt Wave Vivid, click pair if need to receive or make calls from the watch
5. To use all features of your boAt Wave Vivid seamlessly, tap on 'yes' to the 'connection' and 'grant access' system prompt.
6. Disable battery optimization

Note: To ensure connectivity throughout your journey, make sure the app is allowed to run in the background of your phone at all times.

SYNCING YOUR SMARTWATCH TO THE APP

Data Synchronization

- Open the app on your phone.
- Make sure your boAt Wave Vivid is connected to the app
- Synchronization will start automatically once you enter the app interface.

Note: Synchronize data at least once a day to avoid data loss in the watch.

Music

Tap on the remote music control icon on your watch to play music from your phone.

Note: Some apps with different protocols might not work

Breathe

The breathe feature on your smartwatch guides you through quick and calming breathing exercises, promoting relaxation and mindfulness. By following the visual prompts and gentle vibrations, you can take a moment to focus on your breath, reducing stress and finding moments of tranquility throughout your day. The breathe feature serves as a valuable tool for enhancing your well-being and promoting a sense of calm amidst the busyness of life.

Timer

The timer function on your smartwatch allows you to accurately set and track countdowns for various purposes. Whether it's timing your workouts, cooking, or managing tasks, the timer feature helps you stay on track and alerts you when the set time has elapsed. With its user-friendly interface, the timer function is a handy tool to keep you organized and efficient in your daily activities.

Find Phone

Tap on this icon to find your phone. Once enabled, your phone will start ringing and vibrating.

Tap again to stop it.

Note: Your smartwatch should be connected to your phone via Bluetooth and within its range for this feature to work.

Game

Enjoy an exciting airplane battle game, where you can engage in thrilling aerial combat right on your smartwatch. Defeat enemy planes and test your skills in this action-packed gaming experience.

Calendar

Enjoy an exciting airplane battle game, where you can engage in thrilling aerial combat right on your smartwatch. Defeat enemy planes and test your skills in this action-packed gaming experience.

AI Voice

The AI voice assistant feature on your smartwatch allows you to interact with your device using voice commands. Simply speak your requests or questions, and the smartwatch's AI technology will provide you with helpful information, perform tasks, or assist with various functions.

Calculator

The calculator function on your smartwatch provides a handy tool for quick and convenient mathematical calculations. Whether you need to perform simple arithmetic calculations, the calculator on your smartwatch allows you to input numbers and obtain accurate results right on your wrist. It's a useful feature for on-the-go calculations, saving you the hassle of reaching for a separate calculator.

Camera

The camera function on your smartwatch allows you to capture images using App. With a tap on your smartwatch, you can activate the camera and capture photos directly from your wrist. Whether you want to take a quick snapshot or document a special moment, the camera function offers a convenient way to capture images without needing to reach for your smartphone or a separate camera.

SOS

The SOS feature on your smartwatch empowers you with a direct emergency calling capability that you can customize according to your preferences. In times of crisis, simply activate the SOS function to quickly initiate a call to emergency services or a designated contact. This immediate access to emergency assistance can provide you with reassurance and help when it matters most, enhancing your safety and well-being in critical situations.

World Clock

The world clock feature on your smartwatch allows you to conveniently keep track of time in different time zones across the globe. Using the companion app, you can easily set and customize world clock to display the current time in various cities or regions. Whether you're a frequent traveler or need to stay connected with friends and colleagues in different time zones, the world clock feature ensures you're always aware of the time wherever you go, helping you stay organized and coordinate with ease.

Stock Market

The stock market feature on your smartwatch allows you to stay updated on the latest stock prices and trends. By setting up your preferred stocks and using the App, you can conveniently track the performance of specific stocks and monitor real-time market data. This feature provides you with quick access to valuable financial information, helping you make informed investment decisions and stay connected to the ever-changing world of the stock market.

App QR

The App QR feature on your smartwatch simplifies the process of installing applications by utilizing QR codes. With this feature, you can conveniently scan QR code and download the corresponding applications directly to your smartwatch.

Settings

The settings function of your smartwatch provides a comprehensive range of internal features that empower you to customize and control various aspects of your device according to your preferences. Let's explore the key internal features available within the settings:

Dial Setting: Adjust and customize the dial settings to choose your preferred watch face and style, allowing you to personalize the visual appearance of your smartwatch.

General: Access the general settings to configure and manage overall device preferences, including Wrist Awake, DND, Password, Always ON and Bedside Clock.

Brightness: Control the brightness levels of your smartwatch display.

Language: Set your preferred language for the user interface.

Menu Style: Customize the menu style to suit your preferences, whether it's a grid view, list view, or other available options.

Power Off: Turn off your smartwatch using the power off option.

Reboot: Perform a system reboot when necessary, allowing your smartwatch to refresh and resolve any temporary software issues that may arise.

Factory Reset: Initiate a factory reset if needed, restoring your smartwatch to its original settings and erasing all user data.

About: Access essential information about your smartwatch, including device specifications, software version, legal information, and other relevant details.

NAVIGATING THROUGH THE FUNCTIONS PRESS SIDE KEY TO OPEN MAIN MENU

Call Menu

The Call Menu function allows you to manage your calls and access various calling features directly from your smartwatch.

Internal Features:

Contacts: The Contacts feature enables you to store and access a list of your contacts, making it convenient to make calls or send messages directly from your smartwatch. You can add Contacts in smartwatch from the Application.

Call History: The Call History feature lets you view and manage your call logs, including incoming, outgoing, and missed calls. You can easily track your communication history and access relevant call details.

Sports

The Sports function of your smartwatch offers an impressive array of over 100 sports modes, allowing you to track and analyze your performance across a wide range of activities.

Note: Sync your smartwatch to the app to get the detailed analysis

Records

The Sports Records feature in your smartwatch tracks and records your performance data, including distance covered, duration, calories burned, and other relevant metrics, for each sport you engage in. This feature allows you to monitor your progress and compare your performance across different sports activities, helping you stay motivated and improve your athletic abilities.

Activity

The activity tracking feature of your smartwatch allows you to monitor and record your daily activities, including steps taken, distance traveled and calories burned providing you with valuable insights into your overall physical activity level and helping you stay on track with your fitness goals.

Heartrate

The activity tracking feature of your smartwatch allows you to monitor and record your daily activities, including steps taken, distance traveled and calories burned providing you with valuable insights into your overall physical activity level and helping you stay on track with your fitness goals.

Blood Pressure

The blood pressure monitoring feature of your smartwatch allows you to measure and track your blood pressure levels conveniently from your wrist. By regularly monitoring your blood pressure, you can keep a close eye on your cardiovascular health and make informed decisions about your lifestyle and well-being. Please note that for accurate results, it is essential to follow the proper measurement guidelines provided in the user manual.

Note: Measurements are for reference only and not for medical purposes.

SpO2

The SpO2 monitoring feature of your smartwatch measures the oxygen saturation levels in your blood, providing valuable insights into your respiratory health and overall well-being. By monitoring your SpO2 levels, you can assess how well your body is absorbing oxygen.

Note: Measurements are for reference only and not for medical purposes.

Stress

The simple stress monitoring feature of your smartwatch allows you to assess your stress levels throughout the day. By analyzing your heart rate variability and other relevant metrics, the smartwatch provides you with a stress score or indication of your current stress level. This feature helps you become more aware of your stress patterns and encourages you to take necessary steps to manage and reduce stress in your daily life. Please note that this feature is not a substitute for professional medical advice or diagnosis.

Note: Measurements are for reference only and not for medical purposes.

Stopwatch

The stopwatch function on your smartwatch allows you to measure and track your measure elapsed time for various activities. With a simple tap, you can start, stop, and reset the stopwatch, making it useful for tracking your workout sessions, timing tasks, or even monitoring your performance in sports events. The stopwatch feature provides a convenient and precise way to keep track of time on your wrist.

Notifications

The notifications feature of your smartwatch keeps you informed and connected by delivering important alerts and messages directly to your wrist. Whether it's incoming calls, text messages, emails, or social media notifications, your smartwatch ensures that you never miss an important update. With a quick glance at your wrist, you can stay connected and stay in the know, all without needing to reach for your smartphone.

Sleep

The sleep tracking feature of your smartwatch helps you monitor and analyze your sleep patterns and quality. By wearing your smartwatch while you sleep, it can track your sleep duration, detect different sleep stages, and provide insights into your sleep quality. This feature allows you to understand your sleep habits better and make adjustments to improve your overall sleep health and well-being.

Weather

With the weather feature on your smartwatch, you can stay informed about current weather conditions and forecasts at a glance. Whether you need to know the temperature, chance of rain, or general weather outlook, your smartwatch provides weather updates, keeping you prepared and allowing you to plan your activities accordingly.

Alarm

The alarm function of your smartwatch ensures that you never miss an important appointment or wake-up call. You can easily set multiple alarms and choose the desired repetition options. Whether you need a gentle reminder or a more persistent alarm, your smartwatch has you covered, helping you stay punctual and organized throughout your day.

MAINTENANCE

Regularly clean your wrist and the strap of the smartwatch, especially after sweating during exercise or being exposed to substances such as soap or detergent, which may get stuck on the other end of the product. Do not wash the strap with a household cleanser. Please use soap less detergent, rinse thoroughly and wipe with a piece of soft towel or napkin. For spots or stains that are not easy to remove, scrub the area with rubbing alcohol and then follow the above procedure.

FAQ

Search for the app to connect keeps failing

1. Keep the boAt Sync app updated to the latest version.
2. Close all the programs on the watch -> Stop and restart Bluetooth and GPS -> connect again
3. Check and enable notification functions of your phone and keep the phone and watch in close contact.

Note: Make sure your phone system meets Android 7.0 and above and iOS 12.0 and above

My Watch Wave Vivid is receiving no alerts, texts, or phone calls

Make sure smart reminders on the app are on and synced to the Wave Vivid. Also make sure your notification center of the phone is displaying messages. Only then will your smartwatch also display those notifications.

Make sure app is running in the background and battery optimization feature on the phone is disabled.

My Bluetooth keeps getting disconnected

1. Make sure there is not more than 7m distance between Bluetooth on the phone and the watch.
2. There is no obstacle in between the watch and the phone.
3. Make sure the app is running in background.

Which functions of the Wave Vivid need Bluetooth to work?

Call & Text Notifications, Find My Phone, music control, camera control, weather forecast, cloud and custom watch faces and Bluetooth calling need Bluetooth connectivity to work.

Will it be okay to take a bath wearing the Wave Vivid?

The IP68 water resistance will only work under the following conditions:
(1) Maximum depth of water: 1.5m (2) Maximum time for exposure to water: 10 minutes
The watch isn't suitable for hot baths, hot springs, saunas, snorkeling, diving, water skiing and other wading or deep-water activities with high-speed water flow.

SAFETY & PRODUCT INFORMATION

Battery

- Do not disassemble, bore or damage the battery.
- Do not disassemble the built-in batteries of non-replaceable battery devices.
- Do not use sharp objects to remove the battery.

HEALTH WARNING

- If you are wearing a pacemaker or other implanted electronic devices, please consult your doctor before using the heart rate monitor of the watch.
- The optical heart rate sensor will glow green. If you suffer from epilepsy or are sensitive to blinking light sources, please consult your physician before wearing this device.
- The device tracks your daily activities through sensors. This data is intended to tell you about your daily activities such as steps, sleep, distance, heart rate and calories, but may not be completely accurate.

- The device accessories, heart rate sensor, oxygen level monitor, and other relevant data is designed for fitness and not for medical purposes. They are not applicable to the diagnosis, monitoring, treatment or prevention of any diseases or symptoms. The heart rate and blood pressure data is for reference only. We're not responsible for any deviation in data.
- Avoid wearing the watch too tightly. Make sure you keep your skin dry - the area that comes in contact with the watch. If symptoms such as redness or swelling appear on your skin, immediately stop using the watch and consult the doctor.

THINGS TO KEEP IN MIND

- Sync data everyday days to avoid data loss.
- Water Resistance will not work for seawater, acidic and alkaline solutions, chemical reagents and other corrosive liquid. The damage or defects caused by misuse or improper use are not covered by the warranty.
- Sports modes support up to 6 hours of exercise at a time.
- Avoid wearing the watch too tight in daily use. Keep the parts of skin touching the watch dry.
- Keep your arm still while measuring data for accurate measurement.
- Disclaimer: This product is an electronic monitoring product and is not intended as a medical device. We reserve the right to modify or improve any of the functions described in this manual without any prior notice. At the same time, we hold the right to continuously update the product content.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT SUBSTITUTE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.
Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort you contribute to recycle valuable raw materials and treatment of toxic substances.
