WHAT THE WORLD HAS BEEN WAITING FOR

Eco Friendly Surface Restoration Without The Use Of Chemicals or Water

To Our Valued Customers:

We face a new world full of opportunities and challenges-A world where science, technology and innovation are the three most important factors that affect the quality of the earth in which we live. Inappropriate cleaning chemicals and technologies have dominated the marketplace causing irreversible damage to surfaces and the environment-Chemicals are effective but toxic, demanding the need for change.

Tornado is demonstrating the most environmentally friendly solution for cleaning and restoring available in the industry. Tornado is designed and manufactured in Germany by renowned Systeco System, and the technology is already widely used by Governments and Private business throughout Europe. Tornado ACS accomplishes this next to impossible task, quickly, efficiently and very cost effectively, without the use of any chemicals or water.

Tornado Is Ideal For:

- Complete graffiti removal from virtually every surface
- Restoring modern era and historic buildings back to their original condition
- Mold Remediation
- Returning a fire/smoke damaged property back to new
- Removing all rust and paint from metal, brick, plastic, concrete, glass, wood, natural stone, tiles etc.
- Restoring everything from bronze fountains to metal fences

The Only Choice for Eco Friendly, Multi Purpose Cleaning and Restoration

Easy To Operate

Simply plug the machine in, insert our granules solution, and begin full removal process without damaging the original surface. The technology cleans the infected area, while retrieving our granules solution-No cleanup is needed whatsoever! The Tornado removes any and all unwanted markings and restores the original surface quickly.

In Addition:

We remove environmental contaminants while restoring vehicles, boats, buildings, planes, machinery, heavy equipment, and so much more! We have the ability to clean all types of contaminants including but not limited to:

- Road Spray
- Soot
- Iron Oxides
- Caustic Stains, Hydrocarbon
- Printers Ink
- Tile/Rock/Concrete/Natural Stone, Wood/Plastic/Metal
- Paint and Graffiti
- Chemical Emissions
- Rust
- Mold
- Boat Hulls

The Company is engaged in launching the North American, multiplatform brand: Tornado. Our brand will be (as it is throughout the world) synonymous with the opportunity to fully repair and/or restore virtually every damaged surface, from a wall covered in graffiti to restoring the world's most historic buildings.

We encourage you to contact our offices in order to arrange a demonstration of this revolutionary technology at a time and place of your choosing. By working together, we no longer have to pollute or contaminate the earth just because a surface needs to be restored or cleaned!

Again, thank you for your time and interest and should you have any questions, please feel free to contact us at:
1-877-550-7188 or (905) 850-7188

Yours truly,
The Entire Tornado Team

THE WORLD'S MOST ADVANCED GREEN CLEANING SYSTEM

REMOVES GRAFFITI | MOLD | SMOKE & FIRE DAMAGE | PAINT | RUST | GRIME

Remarkable Fast and Effective Restoration without Chemicals

How it works

The mobile jet-system operates with the worldwide patented negative pressure jet principle and consists of only one compact mobile machine. By the use of suitable jet blast medium of different grain and structure it facilitates removal with retrieval of the jet grain being completely dust-free.

The machine contains a generator for negative pressure with a filtering cartridge and dust separation as well as a container for the jet blast medium. Further components of the system are the lighted jet cap and the jet lance, necessary for operation.

Tornado ACS uses a remarkably simple 3-step process for paint removal and a variety of other cleaning and restoring needs.

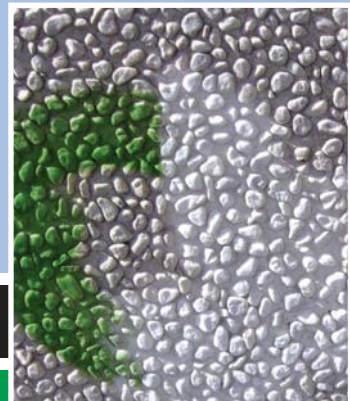

- 1- To start, simply plug in the Tornado ACS machine.
- 2- Then, easily insert the granules that correspond to the finish and contaminants involved.
For example, if your goal is paint removal from brickwork, you'd simply insert our eco friendly walnut jet blast medium.
- 3- Finally, begin the full paint removal (or other selected removal/cleaning) process without damaging the original surface.

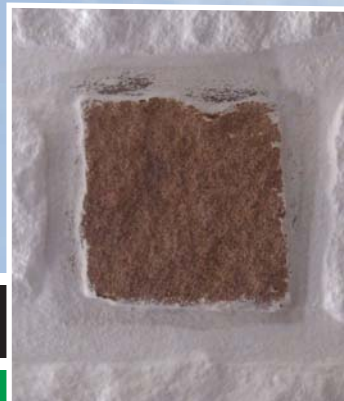

Without messy or unsafe chemicals of any kind, Tornado ACS will clean the affected area quickly and efficiently, restore the surface to its original beauty, and capture 100% of the residue (e.g. paint, rust, etc.).

PLEASE NOTE: Due to the different interactions between mediums and surfaces, results may vary.

It really is that simple and easy!

100% Mold Remediation Safely and without Chemicals!

Mold Remediation is a TOP Health and Safety Priority

Mold remediation is vital to ensure the health and safety of your home or workplace. Mold exposure can trigger allergic reactions, asthma and other respiratory problems – especially for young children, the elderly, and those with a weakened immune system. Furthermore, “black” or “toxic” mold is reportedly linked to a variety of serious symptoms and illnesses, including: learning disabilities, memory problems, chronic fatigue, rheumatoid arthritis, bleeding lungs, and chronic bronchitis, and more.

Tornado ACS’ Mold Remediation solution targets mold caused by these and other common triggers:

- Moisture around windows and doors
- Bathroom shower leaks and condensation
- Roofing problems
- Flue problems
- Inadequate kitchen ventilation
- Plumbing leaks
- Moisture transfer through cement floors and walls
- and many other common, everyday causes

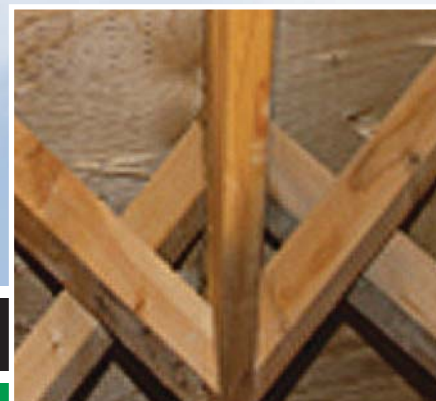

Tornado ACS makes Mold Remediation Fast, Easy, Safe and EFFECTIVE by implementing our three stage approach:

- Identify and cut off the source of water (necessary for mold to grow)
- Eradicate the mold with our eco friendly jet medium
- Encapsulate the mold in our filtering cartridge and dispose of it properly

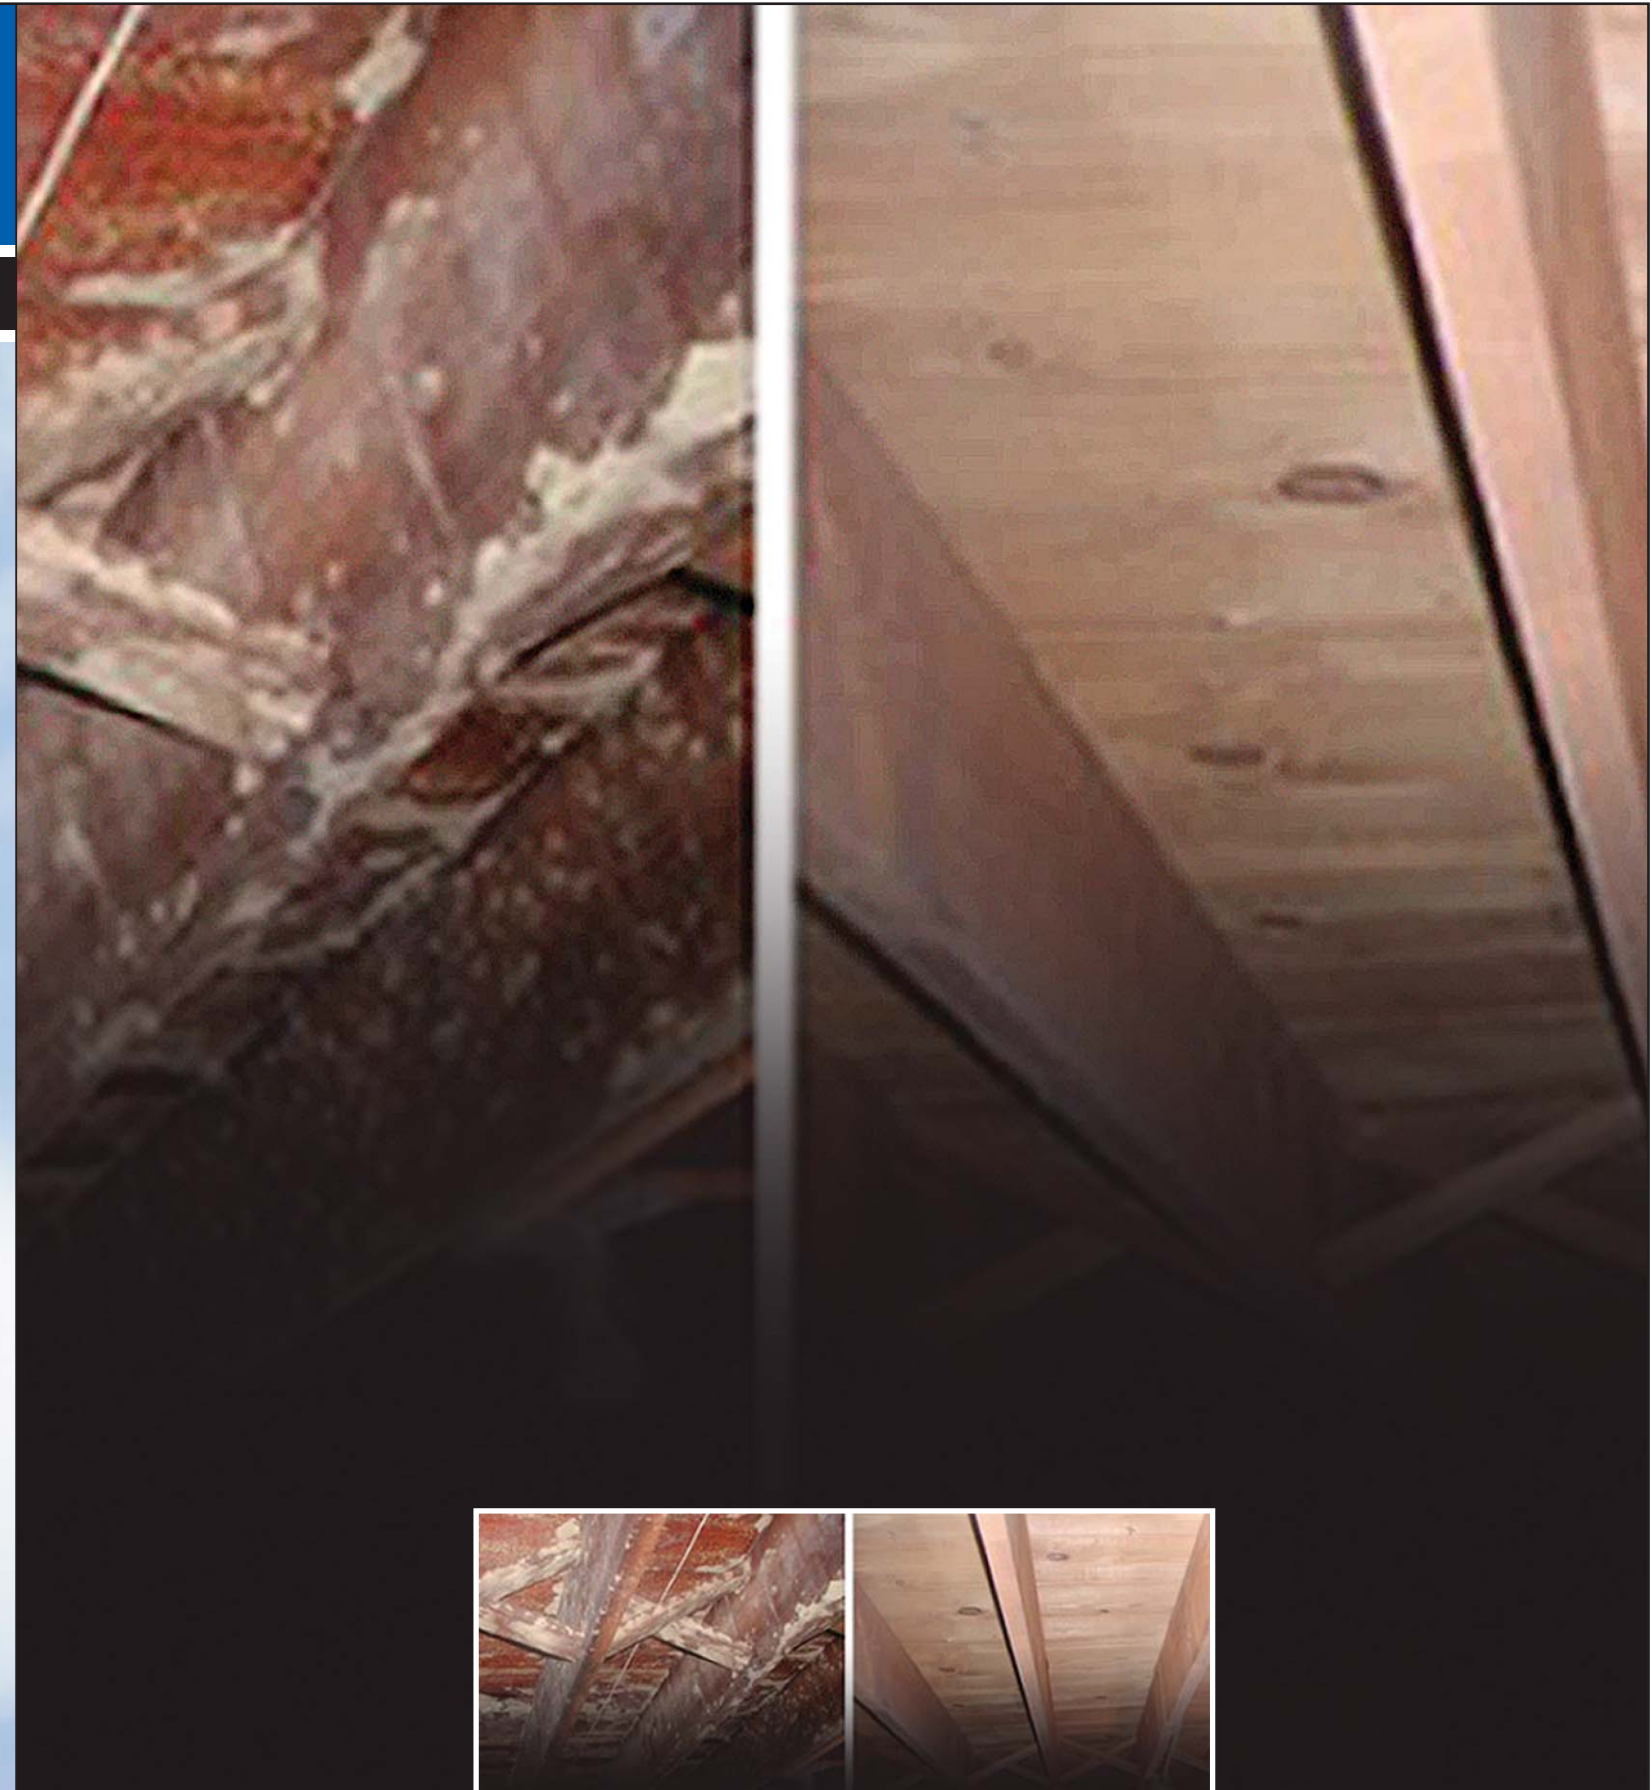

PLEASE NOTE: Due to the different interactions between mediums and surfaces, results may vary.

Tornado ACS has revolutionized the eco friendly, green, mold remediation process!

Quite simply, Tornado ACS is the revolutionary mold remediation solution you’ve been waiting for. In fact, after you use Tornado ACS and see how easy, environmentally safe and effective it is, you’ll wonder how you ever managed without it!

MOLD REMOVAL

Remarkable Fire Restoration without Chemicals or Water

Fire Restoration Can Be an Impossible Task

After a fire, the prospect of cleaning and restoring private or commercial properties can be daunting -- even impossible. The unsightly soot and grime caused by fire and smoke can penetrate surface cavities, leaving unbearable odors and ugly stains that simply won't respond effectively to conventional cleaning methods.

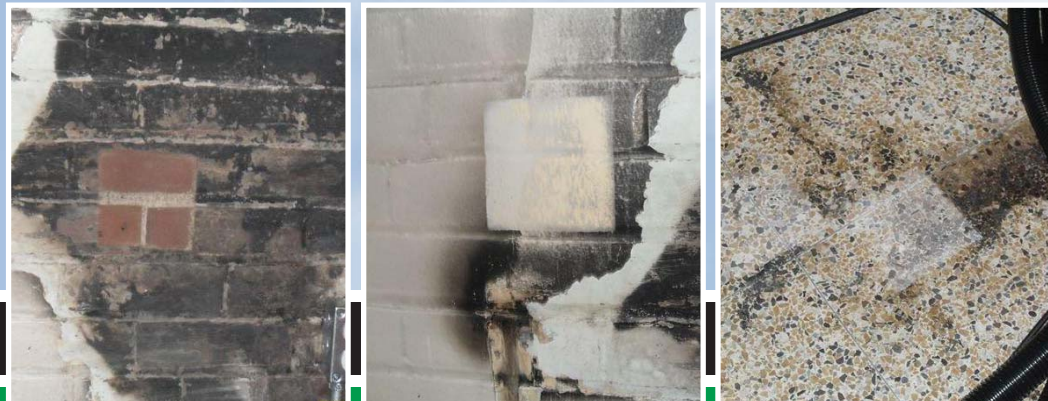

Fire Restoration Is Destructive

Conventional Fire Restoration methods can also do more harm than good --Sanding, scraping and wire brushing can permanently damage surfaces, which is time consuming and costly. Furthermore, since chemicals react differently to various materials (e.g. what works for removing smoke damage from plastics may not work on wood), the conventional process of trying to clean surfaces and remove smoke damage after a fire can be a toxic, hazardous "experiment".

Tornado ACS: A Revolution in Fire Restoration Technology!

Tornado ACS is unlike anything that the North American marketplace has seen before. With NO harmful chemicals or water needed for restoration, Tornado ACS transforms a damaged surface to its original splendor.

**Tornado ACS is fast, easy, environmentally safe, and remarkably effective
--The future of Fire Restoration...TODAY!**

**ECO FRIENDLY SURFACE RESTORATION
WITHOUT THE USE OF CHEMICALS OR WATER**

The Natural Cleaning and Restoring Solution You've been Searching For!

The Environmentally *and* Surface Friendly Graffiti Removal Solution You've been Searching For!

Graffiti Removal Costs are Skyrocketing!

Each year, school boards, property managers, municipalities, insurance companies, and other organizations around the world spend billions of dollars on graffiti removal.

And Graffiti Removal is not just a burden for everyone from private companies to governments to taxpayers – each incident of graffiti can lower property values, which depress overall economic levels in a community.

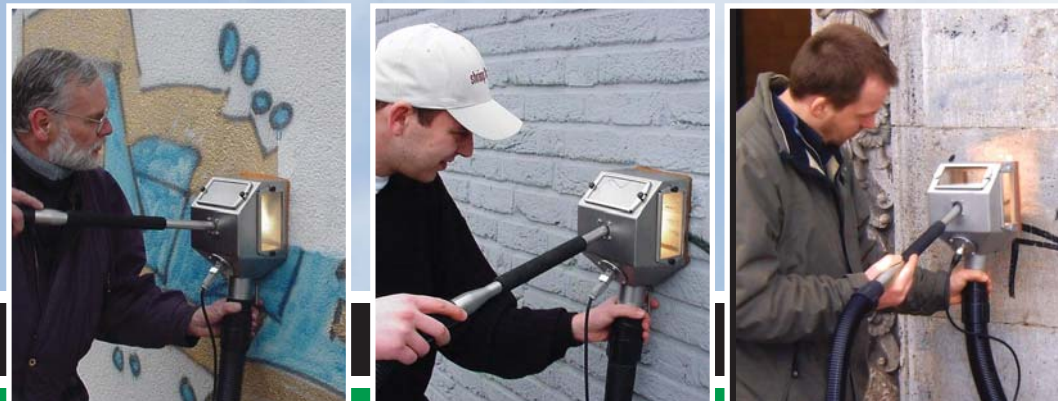

Traditional Graffiti Removal Methods are Expensive and Unsafe

Unfortunately, traditional graffiti removal methods are both expensive and unsafe, because they use toxic chemicals. This not only leads to environmental damage and potential worker health risks, but it can also damage the painted/marked surface – thereby leading to yet more costs in replacements and repairs.

Tornado ACS is the PERFECT and SAFE Graffiti Removal Solution

Thankfully, Tornado ACS is the perfect and safe solution! Simply plug in the Tornado ACS, insert the granules that correspond to the surface you need to clean, and begin the full removal process without damaging the original surface. Tornado ACS even “cleans up after itself” by capturing all of the paint!

There's NO chemicals, NO environmental risks, NO special protective clothing required, and Tornado ACS can be used safely indoors or out. It removes graffiti that was applied yesterday or years ago!

Tornado ACS' revolutionary 100% environmentally friendly graffiti removal solution works magically on brick, concrete, natural stone, tiles, wood, plastic and metal etc.

The Natural Cleaning and Restoring Solution You've been Searching For!

Tornado at a Glance- Key Benefits:

100% Natural Cleaning, Using No Water or Chemicals:

- No acids, caustics or solvents of any kind
- Non-toxic and non hazardous
- Protects people, pets and the environment
- No need to seek environmental protection approval
- No negative impact on the environment

Cost-Effective Natural Cleaning:

- Save money with a cost-effective, re-usable blast medium
- No need for expensive protective clothing
- No need for trained specialized personnel
- Get the job done quick and complete the FIRST time
- Set-up is without expensive roadblock preparation

Gentle Operation:

- Specific jet medium solutions are used based on the type of finish and contaminants involved
- Especially suitable and usable on sensitive and valuable surfaces
- Easy to handle due to distinguishing granulate features
- Won't damage glass or chrome
- Neutralizes surface rust
- Removes paint from fibreglass
- No pitting or warping

Quick & Safe Natural Cleaning:

- Quickly restores surfaces to their original beauty and functionality
- Operation possible ONLY when the jet cap is fitted tightly against the surface and the cycle is closed

PLEASE NOTE: Due to the different interactions between mediums and surfaces, results may vary.

*Engineered by Germany's renowned Systeco System,
Tornado ACS is the world's most advanced green cleaning technology!*

Eco Friendly Cleaning and Restoring Solutions by Tornado ACS!

The Only Logical Choice For Natural Cleaning!

Waterless:

- No need to soak surfaces
- No expensive wastewater disposal
- Can use in cold weather
- Dust free Natural Cleaning:
- All removed waste is captured, filtered and separated
- Ideal for indoor usage

Business & Customer Friendly:

- Plugs into any standard outlet – no special power supply required
- No offensive smell or noise
- Ideal for use in housing or sanitary areas

Quiet Performance:

- No louder than a household vacuum cleaner (merely 75dB)

Light & Compact:

- Weights just under 40kg (90lbs)
- Moves easily and safely on wheels
- Ideal for use on hydraulic platforms, scaffolding, elevators and façade cars
- Transports easily – no special vehicles or personnel required

Quick & Easy Setup:

- Assemble and disassemble in under 10 minutes
- Immediately available for use -- no preparation necessary
- Fast efficient cleaning saves time

Lasts for Years:

- High grade steel and plastic construction is rust-proof and durable
- Virtually maintenance free.

PLEASE NOTE: Due to the different interactions between mediums and surfaces, results may vary.
