

It's the  
**little things**  
that matter!

Introducing  
the **Sureglide™**  
cesarean delivery  
safety scalpel

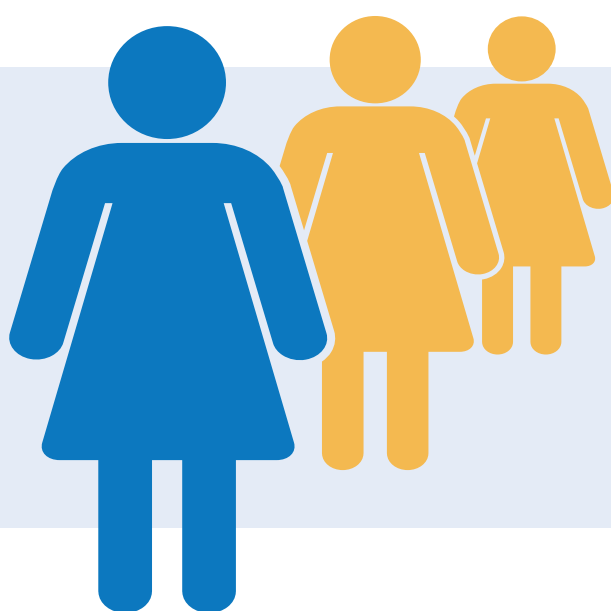

# Congratulations

You have an incredible journey ahead of you. You want everything to be perfect and think about every detail, from prenatal care to what your baby will wear home from the hospital.

Did you know

**1 in 3 WOMEN**

will have a cesarean  
delivery this year?

**Is a cesarean delivery part of your birth plan?** If so, be aware of the

potential risks that can occur to your baby during delivery. Talk to your doctor about the **Sureglide** cesarean delivery safety scalpel and how it can help safeguard your newborn.

**Unlike typical surgical scalpels**

that offer no protection to your baby, the **Sureglide** is specially designed and developed by physicians to help protect your baby from nicks, cuts or lacerations during cesarean deliveries.

THE AREAS MOST EFFECTED

Protected blade  
cuts up and away  
from your baby

Ergonomic handle for  
greater control and clear  
line of sight to produce  
a clean incision that  
promotes faster healing

Specially designed tip offers further protection  
during the incision process

Life's most  
**precious moments**  
should not be scarred by  
preventable events
